Subject: Request for Info - File # 0455-EX-CN-2019

---

Message:

The last item on the list below Ref 49998 was the IARU Coordination Letter. We received the letter today; it is attached, and has been uploaded as an exhibit to the application.

The coordination letter has changed the UHF frequency slightly. We requested 435.01 MHz, and were coordinated to 435.04 MHz. I have updated the spacecap package (attached) to reflect this, and also the FCC application UHF frequency. The spacecap package is a zip file with the extension changed to .itu; it contains the spacecap file with the extension changed from .mdg to .itu; the radiation pattern diagrams; The the ITU Cost recovery letter; and the Operating Agency Symbol request. For completeness I have also attached the API Cover Letter.

Please let me know anything else required. We really need this license by Friday Sept 13, to support integration, so that we are not demanifested.

Thanks,

Mike
