Professor John Belz
University of Utah Department of Physics
115 S 1400 E, Suite 201
Salt Lake City, UT 84112-0830

Dear Professor Belz:

I am writing in response to your questions regarding the construction of a building and fenced-in array of radio transmission antennas on Utah SITLA land in Township 17 S, Range 8 W, Section 13. It is my understanding that this installation will be used as part of an effort to detect cosmic rays using radar technology. The fence will prevent public access to the antennas.

Inasmuch as this construction will be located on property leased by the University of Utah from SITLA, there are no obstacles to construction provided the entire installation, including fencing, is located a minimum of thirty-five feet from the property lines and that you obtain a building permit from the Millard County Building Official.

If you have additional questions, please feel free to contact me.

Sincerely,

Sheryl L. Dekker
Millard County Planning & Zoning Administrator
