Exhibit B
FCC Form 442
Request for Expedited Processing

Unwired Broadband, Inc. hereby requests expedited treatment of this application for temporary experimental authorization. Specifically, Unwired Broadband asserts that expedited action by the Commission is necessary to ensure that Unwired Broadbands' proposed temporary experimental services may be deployed without delay and as soon as possible.

Unwired Broadband, Inc. will have in it's possession the equipment described in this application, and is prepared to install the equipment during the second week of September 2006 in preparation for ongoing regional testing. As a result, a lengthy processing delay would not only be detrimental to Unwired Broadbands' proposed experimental operation as explained in the application, Unwired Broadband seeks to demonstrate, through temporary experimental operation, that the bands are suitable for the operation of unlicensed devices, both inside and outside areas which could be deemed "precluded" by rules proposed by the FCC. Because the Commission is currently considering such rules for the 5.470 to 5.725 GHz band, time is of the essence to ensure that Unwired Broadband may immediately commence its experimental operation and have time to report back to the NTIA on its findings prior to final establishment of rules relating to the 5.470 to 5.725 GHz band. Accordingly, an expedited grant of the instant application is necessary and in the public interest.
