Does that application refer to the 5.4 Ghz application? If so, that is no longer needed due to the general availability of that band now and can be dismissed.

Importance: High

Mr. Kranz,

This correspondence refers to application, FCC File No. 0087-EX-ST-2007, for an experimental special temporary authorization. We were unable to process your application prior to the timeframe of your requested operation.

Does a need still exist to perform this experiment? If so, please respond to this e-mail by close-of-business June 29, 2007. Otherwise, your application may be subject to dismissal

If your answer is yes, would it be possible to lower ERP from 1 W to 0.6 W?
