Subject: RE: Sea Launch STA 74 ML 241

Carl,

My old calculations show that the one transmitter is at 33-45-00; 118-13-12 on the ACS and that the other transmitter when at the pier is at 33-44-41; 118-13-28 (position (1)

The plan is request approval to radiate both frequencies in both directions i.e. 100 degrees and 280 degrees.

/s/Bill Gjertson
