Subject: Supplemental info for STA 0400

Mr. Carl Huie,

The following information pertains to submitted request for STA 0400-EX-ST-2002.

RF attenuation provided by the Sea Launch Payload Processing Facility (PPF) is greater than 20 dB at the specified frequencies, namely:

4198.5 MHz
4199.5 MHz
5926.75 MHz
6420.75 MHz

Please update STA file accordingly. Thank you very much for your assistance.
