Dear Mr. Morgan:

Attached in duplicate is FCC Form 442 and related exhibits. Pursuant to Rule Section 5.55(d), U S WEST Communications, Inc. ("USWC") hereby requests renewal and modification of the PCS Experimental License for Boulder, Colorado for an additional 18 months beyond the November 1, 1995 expiration date. USWC has filed 13 quarterly reports detailing the progress of this trial. The fourteenth progress report is currently being finalized and will be filed shortly.

Up to this point the trial has placed major emphasis on the Boulder Industry Test Bed ("BITB") activities. A variety of radio technologies have been tested in the urban outdoor laboratory setting provided by the BITB. This testing was done in cooperation with NTIA and a number of equipment vendors.

A grant of this renewal will permit USWC to move to the second phase of experimentation outlined in the original application. In this second phase USWC will focus on one specific technology, CDMA. The objectives in this phase are to verify the accuracy of CDMA coverage models, to address technical issues, and to obtain consumer opinions regarding quality of service and wireline-like features. The results of this phase will provide valuable data contributing to the design of services and to the cost effective deployment of PCS.
