Re: U S WEST Communications, Inc.
- File No. 2148-EX-PL-1
- Portland, Oregon
- Minor Amendment to FCC Form 442

Dear Ms. Searcy:

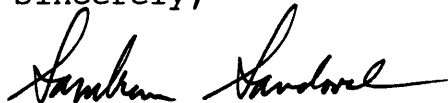

U S WEST Communications, Inc. ("USW/C"), pursuant to Section 5.60 of the Commission's rules, hereby amends the above-referenced application for experimental authorization to perform laboratory measurements to support a wireless access trial. The instant amendment relates to USW/C's application for experimental authorization in Portland, Oregon. A similar amendment is being filed on this same date for USW/C's related application for experimental authorization in Boulder, Colorado.

Ms. Donna R. Searcy
October 10, 1991
Page 2

In response to Section 5.53 of the Commission's rules and No. 10a of FCC Form 442, USW/C seeks to supplement its description of equipment. Specifically, USW/C seeks authority to operate two public base stations, three residential base stations, and six handsets which will comply with the technical parameters supplied to the Commission in the above-referenced Form 442.^{1/} When operating in the Portland, Oregon location, the equipment will be located within one mile of USW/C's Portland facility (Lat. 45-31-19; Long. 122-40-27), as stated in the Form 442 application.

USW/C respectfully requests that the above-referenced application be processed as amended herein. In the meantime, should you have any questions regarding the information contained herein, please contact Elridge Stafford at (202) 429-3134.

Sincerely,

Sambran Sandoval
Manager
Network Transport Technical Services

cc: Zina Morrissey (hand delivered, complimentary copy)

^{1/}

As noted above, USW/C is simultaneously amending its related application for experimental authority in Boulder, Colorado File No. 2148-EX-Pl-91) to request authorization for the same types of equipment as requested herein. USW/C would like to obtain authority to operate all base stations and mobile units at each location so it will be able to implement all of the equipment in either location, as necessary for research purposes. However, only a combined total of two public base stations, three residential base stations, and six mobile units will be operational in both locations at any given time.
