Subject: FCC File No. 0551-EX-ST-2012

Message:

Hi Behnam,

PS

If the narrowband.us applies to this use,
note that the cubesat battery cycle life is only
projected to keep us operational for 2 months from August 2nd launch.
So we will terminate all transmission likely by October 2nd 2012,
certainly by year end, and can control that from ground.

thanks,

Tim Barrett
