Subj: Letter of Intent-Inmarsat Use

Dear Mr. Hardnett,

Val-Comm, Inc. is conducting an experiment to determine the feasibility of using Standard-C terminals to relay pertinent data to a central point via Inmarsat for analysis. The tests will be conducted throughout the contiguous 48 states. All of the tests will be conducted at remote locations where conventional telecommunications are nonexistent. I have included copies of the Inmarsat-C commissioning application and copies of F.C.C. forms 155 and 442 for your records. Please don't hesitate to call if you have any questions. Your assistance is greatly appreciated.

Sincerely,

Paul N Rael
President
