FCC/MELLON JAN 17 1995

Dear Mr. Hardnett,

I respectfully request authorization to continue experiments with the newly developed "M" Terminal technologies. I will be making real time measurements of Digital Communications within the performance specifications per Inmarsat SDM. The terminal will be used at remote locations where conventional telecommunications is unavailable. I have attached FCC form 442, which was submitted to the Federal Communications Commission for your records. I am eager to begin experimenting with the Digital Satcom Terminal. Your assistance is greatly appreciated.

Sincerely,

Paul N Rael
President
