

SIROS NETWORKS CORPORATION
EXHIBIT #1
Item 10 of FCC form 442

a) Description of the nature of the research project being conducted.

The nature of the project is to perform propagation and C/I measurements in the UNII band for comparison to calculated models.

b) The specific objectives sought to be accomplished.

The objectives are to obtain accurate measurements to aid in the design of wireless hardware to utilize the UNII band.

c) How the program of experimentation has a reasonable promise of contribution to the development, extension, expansion or utilization of the radio art, or is along line not already investigated.

Our research did not turn up adequate field trial documentation to sufficiently aid our company in the development of hardware systems associated with this band.
