

JUSTIFICATION FOR EXPERIMENTAL LICENSE

Vislink d/b/a Microwave Radio Corporation is a major diversified manufacturer of microwave telecommunications equipment. An experimental license is respectfully requested for continued research, demonstration at events and customer facilities.

Frequency Coordination with the proper parties listed at
http://wireless.fcc.gov/services/index.htm?job=licensing_3&id=industrial_business

Or the local coordinator at http://www.sbe.org/sections/freq_local.php

Or the event coordinator.

Under no terms would transmission occur without frequency coordination.

Granted an STA could be obtained for use at the customer's facility. However, the cost of getting so many STA's is prohibitive.
