

Vodafone Americas Asia Inc. ("Applicant") seeks to modify its experimental authority under call sign WC2XNA. The modification consists of adding four additional frequency pairs into operation: 900/945 MHz and 904/949 MHz at Station Location 1 and 902/947 MHz and 906/951 MHz at Station Location 2. These four additional frequency pairs will operate under the same technical and operational parameters as previously applied for, and under the same terms and conditions of its existing license. Applicant otherwise respectfully references the exhibits submitted with its original and subsequent modification and renewal applications for station WC2XNA for a full description of the experimental program.
