---

Message:

I was trying to add two new sites to our original application. I was told that I needed to file another STA application using the original application as a template. I did this and got the following:

File# 0341-EX-ST-2014

Confirmation# EL938448

In adding the two sites to this STA application, I first added the Charleston, SC location but may have hit the "submit" button before adding the St. Petersburg, FL location.

Also, before entering the two sites, I was generating the STA application and my Firefox browser locked up and I had to reboot my computer. Do you suppose that the first attempt at the STA application was still in the system when I restarted the STA application?
