Dear Sirs:

RE: License Application for Inmarsat-C

We wish to apply for a Special Temporary Authority License to use an Inmarsat Standard-C portable earth station transceiver in the United States. We have commissioned this terminal through COMSAT; please see a copy of our letter of intent to Mr. W.A. Hardnett in which we outline our intended use of the Toshiba Voyager TM1700A terminals that we own.

In this particular case, however, we wish to use one of the terminals for testing and demonstration purposes only in the United States.

Our other terminals, for which we are not seeking FCC license, are intended for use solely outside the United States for crisis communications use by journalists and relief agencies.

I hope everything is in order. Otherwise, please feel free to contact me at the numbers above.

Sincerely,

A handwritten signature in cursive script that reads "Sheila Webb".

Sheila Webb  
President

ENCLOSURES:

Completed form 155

Check for \$35.00

Completed Form 442

Exhibit A/ Letter of intent

Exhibit B/ License for similar TM1700A Terminal
