

This notice is provided in compliance with 47CFR §5.77(b). WI2XJP will be temporarily adding data transmissions on all authorized frequencies and antennas for transmitter and propagation path evaluation. The modes to be added are:

60HJ2B

125HJ2B

316HJ2B

The purpose of the WI2XJP experiment is to develop digital image/audio modes using multiple QPSK carriers, initial testing with a single carrier QPSK data beacons will provide a baseline.

Testing is expected to commence August 20 2016 and last for until November 30 2016.
