

Dear Mr. Nimesh Sangani,

This is in reply to your correspondence reference number 49155 dated June 26 2019. The FAA has coordinated the 491-510 kHz at both locations, the NG T number for the Wayland Massachusetts antenna is NG T190519, and the NG T number for Skowhegan, Maine is NG T190520. The FAA records are attached separately to this application 0304-EX-CR-2019 and labeled "FAA Coordination for 510 to 517 kHz", these are the most up-to-date records, please disregard the earlier uploaded documents entitled "FAA Coordination".

Respectfully submitted,

Warren H. Ziegler, Ph.D.
(508) 816-3862
