Date: May 01, 2008

Subject: FCC File # 0210-EX-ST-2008

Message:

The transmission at any individual frequency will be less than one (1) minute occurring six (6) times each over a one-day interval. The transmitter will be tuned, keyed, field strength measured, and then unkeyed. The process will be repeated at up to five (5) separate locations within a 1km radius of the transmission site. The locations are mapped and under review with NSA.
