RE: Modification for Experimental Station License
Call Sign: KE2XPZ

by Ray 1

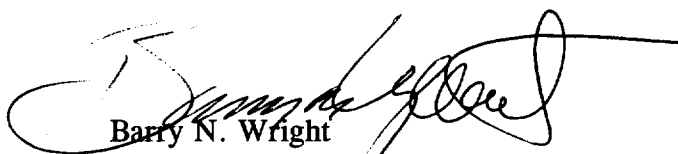

Dear Mr. Huie:

Please find enclosed an FCC Experimental Station Application requesting a modification and extension to the above-referenced experimental station license. The original has been forwarded to the Pittsburgh P.O. Box for processing. However, we would like to change our antenna with as little interruption in our experimentation process as possible. Therefore, this copy is being forwarded to you for processing as soon as possible.

If you have any questions, please don't hesitate to call or contact Ray Hammonds at Washington Laboratories, Ltd. who prepared the application for us.

Thank you in advance for your time and efforts in this matter.

Sincerely,

Barry N. Wright
Manager, Product Assurance
Gaithersburg Plant
