Application Narrative for Proposed Equipment

Proposed Program

West Star Aviation is proposing GPS within their aircraft laboratory for testing purpose.

Objectives

We seek to accomplish the following objectives:

1. Illumination of the part of the laboratory, located at 1390 Hwy. H, Perryville, MO with a GPS signal to allow for the testing and experimentation indoors for continued exploration of utilizing GPS technologies within their aircraft to provide innovative applications and continue to provide safe products.
2. Further design, development and enhancement of existing GPS applications to provide greater efficiency and more effective means of utilizing GPS derived information
