

Exhibit 1

Description of Proposed Operation

Western Atlas International, Inc. is engaged in exploration for petroleum and petroleum products. In connection with this activity, Western Atlas uses a data package for transmission of geophysical information which uses portable INMARSAT terminals for communication. Western Atlas was licensed to operate such equipment under the license for Experimental Radio Service station KE2XBL, but the license for this station expired in November 1995. The purpose of this application is to apply for a new license to replace the license for KE2XBL. The applicant respectfully wishes to retain the old call sign for this license, which is listed above.
