Washington, D.C. 20554

Subject: Experimental License Application

Reference: FCC Form 442

Attention: Carl Huie
Electronics Engineer

Dear Carl Huie:

Since you handled the previous Experimental License for the WiData Corporation, we sent their latest Experimental License Application request for the "WiBar" system directly to you. This technology is being developed in Rogersville, Tennessee.

To facilitate your review, we have included the following items:

- FCC Form 442 with accompanying Exhibit 1; and
- Agent Authorization letter for Pulver Laboratories Inc. from WiData Corporation.

The operation of this newest technology is proprietary. Note the unusually low frequencies of operation. This could lead to a very cost effective RFID system.

Very truly yours,

Pulver Laboratories Inc.
Electromagnetics Division

Lee J. Pulver
President
