Subject: RE: 0037-EX-RR-2008 [confirmation No. EL13242]

Dear Mr. Ghaffari,

Your original question was:

1. Azimuth of transmit antenna with respect to True North (between 0-360 degrees).
2. 2. Elevation of transmit antenna (between 0-90 degrees).

Response:

1. Since the antennas on our devices are vertical there is no azimuth with respect to true north.
2. The elevation of our transmit antennas are always 90 degrees

I hope this clarifies the application. Let me know if you need any further help.

Andy
