Message:

I recently applied for an FCC experimental license and received a subsequent email requesting an exhibit describing our testing.

I am unclear on the level of detail required by this exhibit. I'm assuming that I do not need the level of detail that will be required for certification but I may be incorrect in my assumption.

I have prepared a document that currently includes a discussion on frequencies, a section on antenna configuration requirements, a block diagram and several photos.

Is there additional information required?
