Subject: Request for Info - STA File #1108-EX-ST-2013

Message:

Doug,

Thanks for the email.

Section 2.803(e)(3)(ii) allows a manufacturer to operate a product for demonstration or evaluation purposes.

WPSC's tests may extend beyond equipment demonstration and evaluation into propagation and coverage testing for eventual system deployment. Also, WPSC is working with the manufacturer, but the manufacturer may not be directly involved in the testing.

We received STA from the Wireless Bureau for other (certified) devices that are also being tested, but the equipment subject to this request is not certified for the band WPSC is operating in and experimental STA is requested.

Thanks,
Greg
