Message:

1. Will you be performing any type of market study?

Yes we will be doing market studies - comparing Rural to metropolitan demographics. Our existing network and customer base covers both rural and Metropolitan areas with both business and residential clients.

2. Will you provide services to public and gain any profit if experimental license is approved?

We will be providing services to the public on a voluntary experimental basis. Our current customer base will be solicited to find select locations for transmitting data back and forth for a trial period, with evaluation of the equipment reliability and throughput.

3. What will you do with your equipment when the experiment/demonstration is completed or terminated?

We will hope to have final determination of the frequency prior to the termination of the experimental license.

4. Are you building a network?

We already have an extensive network in place, we will switch out some existing links to the experimental links to evaluate the performance of the frequency and the equipment.

5. Total number of antennas being installed.

We will be placing a total of twenty antennas in the proposed footprint area.
