Pittsburgh, PA

Dear Ms or Mr:

Enclosed is an application for authorization to conduct experimental telemetry studies on free ranging wildlife in the State of Wyoming.

As indicated in the application this technique is a very efficient and extremely economical method of collecting wildlife management oriented data. Collection of these data at the desired level could not otherwise be made from free roaming animals because of prohibitive costs.

Authorization is being sought to cover present equipment as well as equipment that will be utilized in the future.

Sincerely,

Francis "Pete" Petera
Director
