OK, everything looks in order at this time. Just waiting for bank to confirm receipt of filing fee before I can finish processing the renewal. You can check periodically on-line to see when it is granted.

Carl,

I appreciate all the help you've provide in getting this license renewed. The following text is the information I need added to section 5 of our renewal form:

"The purpose for this experimental license is for a piece of Test Equipment that is used to test the functionality of an Assembly Xetel manufactures for one of it's customers. The Assembly being tested does not transmit any signal that would require this license. "

The Form 405 Confirmation Number is: EL7906
The Renewal File Number is: 0064-EX-RR-2000

Thank you again for all your help.

Regards,

John Anderson
