Subject: Assignment of WC2XKA from Xontech to ARES Corporation
Attachments: FCC Form 702 Assignment Application WC2XKA Xontech to ARES - File No. 0006-EX-AU-2007.pdf

Tony,

For your information, we filed the attached application on behalf of ARES Corporation seeking FCC consent to the assignment of the experimental license held by Xontech, Inc. under call sign WC2XKA (OET File No. 0125-EX-RR-2005) to ARES Corporation. Northrup Grumman Space & Communications System Corp. assumed control of Xontech, Inc., under OET File No. 0003-EX-TC-2005 and now seeks to assign the license to ARES Corporation in connection with the parties' agreement.

As stated in the attached exhibit uploaded with the application, ARES Corporation submitted an application earlier for an experimental license that will essentially duplicate the authority provided under call sign WC2XKA. See OET File No. 0182-EX-PL-2006, filed April 6, 2006.

ARES would appreciate it if the assignment application could be processed as a replacement for that license application (and without losing ARES Corporation's place in the FCC processing line). In other words, it would like to see if the assignment application can be granted right away, since the license application has been pending since last April.

Please consider this email as providing you with ARES Corporation's authorization to cancel or withdraw the pending license application upon grant of the assignment application.

Please call with any questions or if you need additional information.

Kurt DeSoto
Counsel for ARES Corporation
