Subject: Request for Info - File # 0060-EX-CN-2026

---

Message:

During the review of your Form 442 submission, I noticed a few inconsistencies that require clarification before we can proceed.

**Frequency Band**

In the Form 442, the operating frequency is listed as 902-928 kHz. However, in the supporting documentation you provided, the frequency band is stated as 902-928 MHz. Could you please confirm which frequency range you intend to request and update the application accordingly?

In the application, you selected Fixed Station and specified a 50 km radius of operation.

At the same time, your supporting document states that "there is no fixed location for the devices."

To ensure accurate processing, could you clarify whether the equipment will operate as a fixed station or as a mobile/portable system?

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of January 22, 2026 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
