### Basic parameters of earphone

Size: single ear (38x16.5x19.5mm)  
 Weight: single ear (6.7g)  
 Headset battery capacity: 30mAh  
 Headset charging time: 2h  
 Operating voltage: 3.3V-4.2V  
 Music playback time: 4-5h  
 Talk time: 3.5-4.5h  
 Bluetooth version: 5.2  
 Support: A2DP1.3 HFP1.7 HSP1.2 AVRCP1.6 SPP1.2  
 Operating frequency: 2.402GHz-2480GHz  
 Communication distance: 10M  
 Audio encoding format: SBC,ACC  
 Operating temperature: -20°C-55°C  
 Relative humidity: 10%-85%  
 Non freezing state

### Basic parameters of earphone horn

Horn specification: 2Xφ13mm SPK  
 Impedance: 32Ω±15% Copper ring moving coil  
 Frequency: 20Hz-20KHz  
 Sensitivity: -42±3dB  
 Input power: normal 2MW, maximum 5MW

### Basic parameters of earphone microphone

Mic type: Silicon Microphone Mic  
 Sensitivity: -42±1dB  
 SPL: 111dB±3dB

### Basic parameters of charging box

Charging interface: Type-C  
 Charging time: 2 hours  
 Battery capacity: 350mAh polymer lithium battery

### Safe use instructions

To avoid damaging your hearing, please keep the volume at an appropriate level and avoid listening to music at a high volume for a long time, which may cause permanent damage to your hearing and deafness.  
 Please do not use headphones when driving, cycling, crossing the road and so on need your attention.  
 Note: if you use headphones when watching video, the audio and video may be slightly out of sync.

After charging, please pull out the charging line from the machine body to avoid keeping the product in a charging state for a long time. It is better that the output voltage and current of the charger are 5v-1a or 5v-1.5a. If the output voltage or current of the charger exceeds the specified range, it will cause serious injury to the product itself, and the product warranty will be invalid at the same time.

### TWS true wireless Bluetooth headset user guide and precautions

1. All Bluetooth products are affected by the use environment. Please do not use them in the environment with large electromagnetic field / strong radiation. The Bluetooth signal will be disturbed and stuck.
2. When the power of the earphone is less than 10%, the receiving power distance will be insufficient. It is recommended to use the earphone when the power of the earphone is sufficient and charge the earphone frequently.
3. When there are obstacles or multiple 2.4GHz signals in the same frequency band, the Bluetooth signal will be disturbed and even Caton will occur.
4. Please do not put the Bluetooth headset in the water or beat it, which will cause damage to the headset, speaker and sound quality variation.
5. If your headset is not used for a long time, it is recommended to charge it once every 30 days to prevent it from starting normally due to lack of power.
6. We may change the software or hardware of this product without notifying you in advance. Parts and appearance have been upgraded and transformed, subject to the receipt of physical objects.

### FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.  
 Note 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:  
 —Reorient or relocate the receiving antenna.  
 —Increase the separation between the equipment and receiver.  
 —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.  
 —Consult the dealer or an experienced radio/TV technician for help.

### FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

### FCC Note

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
