

DD251H

5-channel Emitter Instruction

Version: A/01

Instruction Of Buttons

Technical specification

Battery: 3V (CR2430)	Battery life: >2 years	Radio frequency: 433.92MHz
Working temperature: -5°C~50°C	Quiescent current: ≤1uA	Working current: ≤20mA

Radio range: 30 meters indoor

Warning

1. Emitter couldn't expose to moisture or be struck heavily, or else the emitter life will be affected;
2. If the emitter is not so sensitive or the radio range becomes shorter, pls check whether to change the battery;
3. If you press any button more than 20s, the emitter will stop sending radio signals;
4. It's forbidden to use different type battery to avoid any dangerous risk;
5. Dispose of used batteries properly.

Combination Button Lock / Unlock Operation

Note: 1. The factory default is unlock status, repeat same operation to switch status circularly. 2. When the combination buttons are locked, if you press the combination buttons, the emitter won't send any signal and LED won't flash. 3. Only the transmitting code will be affected if the combination buttons are locked.

Press and hold
STOP button 15s

Caution:

This device complies with Part 15 of the FCC. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference;
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
