User Manual

4 IN 1 SELFIE SPEAKER LIGHT

Function Features

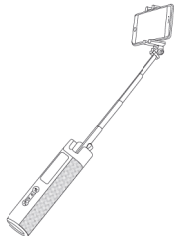

- Selfie stick
- Power bank
- BT speaker 5.0
- Flashlight
- Microhands-free call
- TF card player
- U-disk player
- FM radio player
- Silicone rubber dust plug

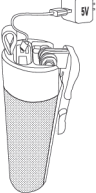

Open the selfie stick to take selfie

Before using the selfie function, open your Bluetooth. Make sure Bluetooth is connected with your mobile phone. Then you need to stretch the stick to the required length, and clip your phone with the selfie stick clamp. Next, adjust the shooting angle, open the phone's camera function, short press the selfie button above the speaker, and you can complete the selfie function.

Recharge your speaker

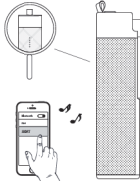

Open silicone rubber dust cap on the top of the machine. Then insert the end of the charging line into the Micro USB interface (Figure 12), and the other end (the larger one) into the 5V charger or computer USB interface, after which the machine enters the state of charging. In the process of charging, the LED power supply light will change from red to blue. When the fourth blue light is illuminated, the machine is fully charged.

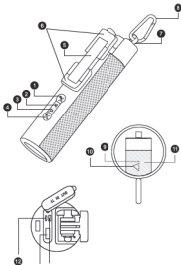

Recharge your mobile phone or other digital devices

Bluetooth pairing connection

Press the button "on/off". Bluetooth indicator light keeps flashing, means the stereo is in the search of matching. Open your mobile phone Bluetooth function, then find and click the equipment name of "HK-WST001" in Bluetooth device. Then the machine will automatically enter the pairing mode. There will be warning tone after the successful pairing. The machine will automatically enter the sleep mode if it is still unpaired after 3min. Then please restart your Bluetooth for another connection.

1. Turn on the speaker and quick double-click power button (Figure 1) into FM mode.
 2. Click the flashlight/pause button (Figure 4) to auto search the channel.
 3. After press (Figure 2 or Figure 3) to select the channel you want.
- Note: Pull out the selfie stick as the antenna for better performance.

Product technical specifications
Speaker size: 40mm
Speaker resistance: 4Ω
Speaker output power: 3W
Power input: DC5V 2.1A
Power output: DC5V 2.1A
Battery type: 18650 lithium-ion battery
Battery capacity: 1200mAh
Notes
1. Do not adjust the output voltage higher than the device voltage, otherwise it may cause damage to the equipment.
Please be sure of this before using.
2. Please use the specified charger.
3. Prohibit from short circuit, breaking down or throwing into the fire.
4. Do not disassemble the charger and battery to transform.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna.

.Increase the separation between the equipment and receiver.

.Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

.Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

RF Exposure Information

The device was evaluated to meet general RF exposure requirements. This equipment should be installed and used with a minimum distance of 0 mm between the radiator and your body.
