E-Chronos SA, Rue des Sillons 1, 2800 Delémont, Switzerland, would like to apply for Modular FCC Approval. This letter is our application for such according to FCC Part 15.212:

FCC ID: 2A2B4-36915V3-2

Modular Approval Requirement	Yes	No
(i) The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.	The radio section has its own shielding.	
(ii) The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.	It has been integrated in the microcontroller.	
(iii) The modular transmitter must have its own power supply regulation.	The radio section has its own regulator.	
(iv) The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of § 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section.	See test report.	
(v) The modular transmitter must be tested in a stand-alone configuration	See test report.	
(vi) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	The module has its own label. The instruction for labelling rules for the host device has been clearly stated in the user's manual.	
(vii) The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.	The required FCC rules have been fulfilled and all instructions for maintaining compliance have been clearly stated in the user's manual.	
(viii) The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.	See test report. The installation of the module is stated in the installation instruction of the user manual. For portable applications the SAR evaluation is done by applicant.	

Sincerely,

Porrentruy, July 5, 2024
