Frequently Asked Questions

Q1: How to use the keyboard and mouse?

A1: The keyboard and mouse share one USB Receiver together. Just plug the USB receiver into your computer, no driver needed. You can use it within a distance of 10 meters, Going through the wall maybe impacted.

Q2: Is this compatible with IOS?

A2: The device supports Windows/Mac/iOS, but the F1 to F12 multimedia function keys may not be supported iOS.

Q3: How long is the life of a lithium battery?

A3: The battery starts to decay after being charged 400 times, but it can still be used,the working time becomes shorter.

Q4: How long does the keyboard to be fully charged? How long can the keyboard battery last?

A4: If it is an ordinary charger, it takes 16 hours, if it is a fast charger, it takes about 5-6 hours. Underthe fully charged, you can use it for over 400 hours.

Q5: If you meet this following questions or other more questions:

- ① Does not match the device.
- ② The keys work intermittently.
- ③ Input responded slowly, insensitive, lagging.
- ④ Long charging time and Power consumption.
- ⑤ The mouse scroll wheel is too unstable to move.

A5: First, please make sure whether the keyboard can be turned on and power on. If it still can't be used, please contact our after-sales mailbox:

Hayyieshservice@163.com

We will deal with your problem as soon as possible.

Troubleshooting

Unable to connect the device

First, please fully charge the keyboard and mouse, unplug the receiver, restart the computer, and re-plug the receiver. If it can't be connected, please perform the following actions to fix it.

1. Keyboard can not be connected

Plug the 2.4GHz USB receiver into the computer.

Switch on the keyboard, press the  + 

Put the keyboard at 10 cm from the receiver for pairing. For more than 2-3 s, when the light is off, the keyboard pairing succeeds.

2. Mouse can not be connected

Plug the receiver into the computer and turn on the mouse.

Put the mouse at 10 cm from the receiver for pairing. Press the right button & scroll wheel together for more than 2-3 s, it's successful.

Keyboard typing delayed/not working

1. Make sure there is no 2.4GHz device (e.g. router) nearby to interfere with the connection.
2. Make sure the keyboard and mouse fully charged.
3. Make sure there is no full metal case that may block the signal.
4. The computer is running too many tasks and the CPU memory is full to handle the signal from the receiving end.

Mouse not working / Cursor lagging

1. Please check the mouse's battery, low battery status will cause the cursor delay. At this time, you can charge the mouse for 2 hours and use it again.
2. Adjust to the appropriate DPI parameters. (The mouse has three levels of DPI adjustable)
3. If the wired mouse is connected to your computer at the same time, please unplug the power cord, otherwise it may lead to a conflict of operational driver factors.
4. Make sure your mouse is not used on materials with good light transmission media such as glass. (Mouse using diode positioning, glass and other materials will lead to inaccurate positioning group and delay)

Shortcut keys not working

Unplug the USB receiver and plug it back in.

Keyboard and mouse not charging

1. Please confirm the charging status of the keyboard and mouse, charge it for 60 minutes and turn it on to see if the indicator light can blink normally:
Stable red light - charging
Light off - fully charged
Flashing light - keyboard battery power low
2. Please try another charging cable to check if it can be charged normally.
