

## specification

1. This acknowledgement details the physical and electrical characteristics of the FOLDABLE MAGNETIC 3-IN-1 WIRELESS CHARGER, which has QC3.0/PD protocol identification, complies with the WPC-Qi V1.2.4 standard, and supports two-way transmit-to-receive communication.

This module uses the principle of electromagnetic induction to quickly wireless charge Apple, Samsung, Huawei and other mobile phones, charge Apple headphones, and charge Apple Watch.

### 2. Apple Watch charging

Support Apple iWatch (3W fast charge) wireless charge Support Apple iWatch (3W Fast Charge) wireless charge

◆ Supports DC 5V input

Compatible with S2~S8 watch devices. Compatible with S2~S8 watch devices

Compatible system versions (see Table 1 below) Compatible system versions (see Table 1 below)

### 3. Comes with metal detection protection function

When a metal object larger than a dollar coin is detected on the product surface above the center of the transmitter coil, the blue light flashes, the transmitter stops working, and

the transmitter returns to normal operation after the metal object is removed.

#### 4. Attention!

The iPhone and the external receiver sticker do not have a full indicator state, and the charging state is always maintained, and the charging state can be viewed from the phone itself.

#### 5. FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between 20cm the radiator your body.
