Answer questions

- If you're experiencing interrupted or slow charging, check the following:
 - The back of your phone should not have any metal, pop sockets, or credit cards.
 - Put the phone in the center of the charging surface (this lets the charging coil in your phone line up with the one inside the wireless charger).
 - The wireless charging coil on Sony phones is located slightly below center.
 - Phone cases should be no thicker than 5 mm for effective charging.
 - Check whether the adapter is QC3.0 fast charger.
- If you're failing to charge your device, please try out the following:
 - Please restart your cell phone and test with other USB cable.
 - Please check whether the indicator turns on or not.
 - Please check the Adapter is QC3.0 Quick Charger (Output: 9V/2A) or not, iPhone original adapter does not match the wireless charger.
 - Please check your Phone case thickness (≤ 5mm). Metal ring or Magnetic Pad will not be available.
- If you're using the recommended wireless charger with the QC3.0 Adapter and have removed any potential charging obstructions, but are still experiencing issues, try:
 - Replacing the cable connecting your the wireless charger.
 - Rebooting your phone.
 - Unplug the adapter and reinsert.
