### Smart LED Bulb Manual

Before installation, let's know how the whole thing works.

Step One: Fundamental set-up - Connect smart bulb to Smart Life App.  
Step Two: Optional set-up - Connect Smart Life App to Amazon Alexa or Google Assistant.

After completing Step One, you can remote control the bulb on Smart Life App. After completing Step Two, you can voice control the bulb with Alexa or Google Assistant. This manual consists of three parts.

**Part One**  
How to pair the bulb to Smart Life App? ..... 3 - 7

**Part Two**  
How to control the bulb with Amazon Alexa? ..... 8 - 10

**Part Three**  
How to control the bulb with Google Assistant? ..... 11 - 12

### Part One – How to pair the bulb to Smart Life App?

**Step A:** Smart Life app installation  
Please choose either way below to download and install the app.

- As per your phone system, choose the QR code to scan.

iOS      Android

- Search keyword 'Smart Life' in Apple Store or Google Play.

**Step B:** Create an account on Smart Life and login.  
Note: Please keep your account and password in mind for Alexa or Google Assistant App pairing later.

3

**English** Create Stellar Lighting Experience

**Step C:** Add the bulb to Smart Life App

- Tap '+' button on top right corner to add device, then tap 'lighting devices' to enter next page.

- WiFi Connection  
This smart bulb only supports 2.4GHz WiFi network, not 5.0GHz. Please make sure your working network is 2.4GHz, and your phone is connected to the required WiFi network.

(1) Power on the bulb with your own switch.

4

**English** Create Stellar Lighting Experience

(2) Observe how frequently the bulb blinks to identify which mode it is in.

- Smart Life App supports two WiFi networks, EZ (Easy) Mode and Access Points (AP) mode. When in EZ Mode, the bulb blinks rapidly (about 0.5s per blink); when in AP mode, the bulb blinks slowly (about 3s per blink).
- EZ Mode is the easier way for WiFi connection. When the bulb is in AP Mode, you can change it to EZ Mode by repeatedly turn on-off-on-off-on the switch to activate the bulb into rapid blinking status (about 0.5s per blink).

(3) Confirm the bulb is in EZ Mode, then tap 'confirm' button to proceed. If you need help, tap 'view help' for more details.

5

**English** Create Stellar Lighting Experience

(4) Enter your WiFi password, tap 'ok' button and wait till it is successfully connected.

If you want to explore AP Mode, you can tap 'AP Mode' on top right corner, and follow the detailed instructions by tapping 'view help' on the next page.

6

**Step D:** Give a name to the bulb.

- A simple name is recommended for easier voice recognition with Alexa or Google Assistant.
- The name given to the bulb will be the same for voice control on Alexa or Google Assistant. For example, the bulb is named 'smart bulb' on this user guide.

**Step E:** The named bulb will be shown on the app homepage. Now you can control the bulb (turn on/off, change colors, adjust brightness ect) with Smart Life on the setting page. Turn on or off the bulb by tapping the bulb icon.

Note: To control the bulb with Amazon Alexa, please read Part Two. To control the bulb with Google Assistant, please read Part Three directly.

### Part Two – How to control the bulb with Amazon Alexa?

Please make sure that your Alexa app is connected to Echo, and both work well under your WiFi network.

**Step A:** Log in your Alexa App, tap top left corner, and tap 'Skills'.

**Step B:** Type 'Smart Life', find 'Smart Life' from the search result and tap it to enable the skill.

8

**English** Create Stellar Lighting Experience

**Step C:** Enter your Smart Life App account and password. Tap 'Link Now', then tap 'Authorize' on the next page to bind Smart Life account to Alexa.

**Step D:** When your Smart Life account is bound to Alexa, tap 'DISCOVER DEVICES' to detect the bulb.

**Step E:** When the named bulb is paired to Alexa from Smart Life, it will show on the device page (see the 'smart bulb' example).

9

**English** Create Stellar Lighting Experience

**Step F:** Now you can control the bulb with Alexa App on the setting page. To turn on or off the bulb, simply tap the bulb icon.

**Step G:** You can also voice control the bulb with Alexa by giving these commands: "Alexa, turn on 'device name'", "Alexa, set 'device name' to 'color'", "Alexa, set 'device name' to 'number' ". Device name is the one you give to the bulb. The bulb is named 'smart bulb' in this user guide. For example, "Alexa, turn on 'smart bulb'", "Alexa, set 'smart bulb' to 'blue'" etc.

Note: To control the bulb with Google Assistant, please continue to read Part Three.

### Part Three – How to control the light with Google Assistant?

**Step A:** Login Google Assistant App, tap 'Home Control' on the left side bar page.

**Step B:** Tap '+' button on the bottom right to enter next page.

**Step C:** Find 'Smart Life' from side bar list.

11

**English** Create Stellar Lighting Experience

**Step D:** Enter your Smart Life App account and password to bind Smart Life account to Google Assistant.

**Step E:** You will find the named bulb shows on the Home Control page. Now you can control the bulb on Google Assistant App, or voice control it by giving these commands: "ok Google, turn on 'device name'", "ok Google, set 'device name' to 'color'", "ok Google, set 'device name' to 'number'".

Device name is the one you give to the bulb. The bulb is named 'smart bulb' in this user guide. For example, "ok Google, turn on 'smart bulb'", "ok Google, set 'smart bulb' to 'blue'" etc.

FCC Warning Statement  
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:  
-- Reorient or relocate the receiving antenna.  
-- Increase the separation between the equipment and receiver.  
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.  
-- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement  
The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located for operating in conjunction with any other antenna or transmitter.
