1. SAFETY INFORMATION

1.1. General Preventive Measures

- 1.1.1. Please read, understand and follow the instructions.
- 1.1.2. Store the instructions and information in a safe place.
Best solution is the ring binder provided by ROXX.
- 1.1.3. Follow all safety warnings. Under no circumstances remove safety warnings or other information from the equipment.
- 1.1.4. Don't use the equipment for any other intended purpose or manner.
- 1.1.5. Use only stable and compatible stands and/or brackets. Especially when fix installed. Make sure the wall brackets are properly installed and safe. Make sure the device is securely installed and cannot fall.
- 1.1.6. Check the safety regulations applying for your country before and during installation.
- 1.1.7. Keep the device away from heat! Don't place/install near heaters, ovens or any source of heat. Make sure that the device always is efficiently cooled and cannot overheat.
- 1.1.8. Always guarantee that ventilation and cooling slots are clean and not blocked.
- 1.1.9. Item must be away minimum 20cm from anything around and above it.
- 1.1.10. Do not use this device close to water.
- 1.1.11. Do not expose this equipment to flammable materials.
- 1.1.12. Make sure that no objects can fall into the device.
- 1.1.13. Only use this device with the accessories recommended by the manufacturer.
- 1.1.14. Always check the equipment for housing damages, so that no water can enter the device. No containers containing liquids of any kind should be place on top of the unit.
- 1.1.15. Opening or modifying this device is only allowed by authorized and qualified persons.
- 1.1.16. All cables need to be checked after connecting the device in order to prevent damage or accidents.
- 1.1.17. Make sure that the device is transported safe and packed proper in order to prevent damage of any kind.
- 1.1.18. Once you notice improper function of your device due to damage, electric shock or anything similar, immediately unplug the unit from the mains outlet and contact our service department.
- 1.1.19. Clean the device with a dry cloth.

- 1.1.20. Observe all disposal laws applicable in your country. Especially for the packaging.
- 1.1.21. Plastic bags are not a toy! Keep away from children!
- 1.1.22. Please note that changes or modifications which are not approved by the party responsible for compliance will void the user's authority to operate the device.

1.2 Regulations for equipment that connects to power mains

- 1.2.1. If an earthing contact is available in the used power cord, it must be used in combination with a power outlet, providing a protective ground. In no circumstances should the protective ground be deactivated.
- 1.2.2. Do not switch on the device immediately after it has been in strong different temperatures, especially after transport. Let the device acclimatize to the temperature in the room of usage first to prevent moisture and condensation.
- 1.2.3. Verify that the correct voltage and frequency are available in the area of operation, before connecting the unit to the mains outlet.
- 1.2.4. If the plug doesn't fit in your mains outlet, contact your electrician.
- 1.2.5. Make sure your power cord/adaptor/connector does not show signs of kinks/warps or is being stepped on.
- 1.2.6. Always disconnect the unit when not in use or being cleaned. Don't pull on the cord to disconnect. Only touch power connections with dry hands!
- 1.2.7. Don't switch the unit on/off rapidly. This may cause damage.
- 1.2.8. If a fuse needs to be replaced, ALWAYS make sure that exactly the same fuse will be used (type and rating). Repeatedly blown fuses need to be checked by an authorised service technician.
- 1.2.9. In the risk of lightning strike all units need to be unplugged from the mains in order to prevent damage.
- 1.2.10. During installation there must be a voltage free condition.
- 1.2.11. The device needs to be cleaned and serviced regularly and will credit this with a longer life cycle. Dust, dirt, moist, water, smoke, nicotine or anything similar inside the unit will cause damage/malfunction.
- 1.2.12. The unit needs to have at least 0,5m distance to anything flammable.
- 1.2.13. You have to make sure that any electrical installation applies to the laws of your country. Correct power cables and applying standards have to be used.

1.3. Technical warnsigns and explanation

In order to prevent the risk of an electric shock, under no circumstances remove the cover/back or open the unit in any way! No user serviceable parts are inside. Service, maintenance and repairs should only be done by qualified service personnel or the manufacturer.

Dangerous uninsulated voltage inside the device can cause an electrical shock when opened by unqualified personnel.

Important operating and maintenance instructions apply!

Do not operate this device in tropical climates.

CAUTION! Intense LED light source! Risk of eye damage. Do not look into the light source

The housing surface of the spotlight can heat up to temperatures as high as 70 °C in regular use. Ensure that it is not possible to come into contact with the housing unintentionally. Always allow sufficient time for the lamp to cool down before dismantling, carrying out maintenance work or charging etc..

The fixture has an integrated, non-removable battery, do not attempt to remove the battery. Do not open the headlamp. To replace the battery, take the device to an authorized service center.

Fully charge the battery again immediately after discharging. Batteries that are not fully charged lose capacity and service life.

For short to medium-term storage of the headlamp, fully charge the battery.

If the headlamp will not be used for a longer period of time, use the "Storage" function inside the device settings to charge the battery. This limits the maximum charging capacity to 40% and thus preserves the life of the battery.

Do not charge the battery of the E.FLEX / A.FLEX headlamp at ambient temperatures below 0°C / 32° F and above 40°C / 104°F.

If the headlamps are charged inside a flightcase, the case lid must remain open during the entire charging process in order to avoid heat accumulation.

- This is a product which has been developed for professional usage in event technology. It is not suitable as a household lighting.
- NEVER stare, not even temporarily, directly into the light source.
- Don't use magnifiers or any other optical instrument to look at the beam.
- The effects of this device, especially the stroboscope effect, can cause problems for sensitive people or may even cause epileptical seizures.

1.4. Battery Safety

- 1.** Keep the battery poles away from conductive objects, such as keys, jewelry, or other materials. Otherwise, the battery may be short-circuited, resulting in injury and burns.
- 2.** Never change the polarity of the battery's contacts.
- 3.** Keep the battery away from excessive heat and direct sunlight. Do not place it on or in heating devices, such as microwaves, ovens, or radiators. Batteries may explode if overheated.
- 4.** Do not attempt to modify or rework the battery, insert foreign objects into the battery, or immerse the battery in water or other liquids.
Do not attempt to modify or rework the battery, insert foreign objects into the battery, or immerse or come into contact with water or other liquids. Failure to do so may result in fire, explosion, or other hazardous dangerous situations.
- 5.** In case of battery acid leakage, make sure that it does not get on the skin or in the eyes. If it does, rinse immediately with clean water and consult a doctor.
- 6.** In case of deformation, color change or overheating of batteries during charging or storage, stop using the device immediately. Immediately stop using the device and remove the battery. If you continue to use the device, battery acid may leak or a fire or explosion may occur.
- 7.** Do not dispose of batteries in fire as they may explode. Damaged batteries may also explode.
- 8.** Dispose of used batteries in accordance with local regulations. Improper use of the battery may result in a fire, explosion, or other hazardous situation.
- 9.** Do not allow children or pets to chew, suck or suck on the battery. Doing so may cause damage or an explosion may occur.
- 10.** Do not smash or puncture the battery and do not subject it to high pressure. Otherwise, it may cause a short circuit or overheating.
- 11.** Do not drop the device or battery. If the device or battery is dropped, especially on a hard surface, it may be damaged.
- 12.** If the standby time of the device shortens significantly, replace the battery.
- 13.** If the device has a built-in, non-removable battery, do not attempt to remove the battery as the device may be damaged. otherwise the device may be damaged. To replace the battery, take the device to an authorized service center.

2. INTRODUCTION

2.1. About us

The name ROXX® came easily.

Combined with the concentrated knowledge and many years of experience, our three founders, who have been leaving their mark in the event and lighting industry for many years already, came together in 2020 to start this outstanding venture.

Product development, sales and marketing as well as the exceptional know-how and the profound rooting in the field of the professional lighting technology belong to our core competences and therefore guarantee extremely innovative and reliable products, excellent support and professional service in every aspect.

Designed & developed in Germany

ROXX® products are developed and designed in Germany. Always in tight consultation with our customers and experts who will eventually be working with these tools. This ensures innovative, easy-to-use and performance-oriented solutions, which provide added value for our customers.

Made to last

Recommended for permanent outdoor use, most ROXX® products feature additional corrosion protection and enhanced IP66 equipment protection, thereby providing that crucial extra for a wider range of applications. In addition to architectural or theme park applications, even fixed installations in coastal or offshore areas with high salt exposure can be reliably implemented over long periods of time.

2.2. E.FLEX A.FLEX

The E.FLEX /A.FLEX is a battery driven, dual light source fixture for professional use in indoor and outdoor applications such as wall washer, spotlight, deco-effect light and many more. The very narrow beam lens from centric LED, in combination with various filters and the single pixel controllable HALO EFX ring gives room for unlimited creativity. Due to the special designed dual-bayonet system all our one-size accessories like holographic filters, glare-shields or creative adaptors such as FLEX Light Tubes, HAT and HALO can be combined and fit tool-free to all FLEX models. Thanks to the inner bayonet, filters can be changed easily, from native 3° to circular 5°, 10°, 20°, and elliptical 5°x20° or 5°x30°. A special batwing filter creates a V-shaped beam as a wall wash effect for even more creative effects. One central high-power LED, in combination with twenty-four ultra-bright SMD LEDs create amazing, bi-color effects in wall-wash and deco-light applications. Due to its single pixel control, ROXX® HALO EFX engine allows advanced and creative effect possibilities and a stunning eye-candy look. The individual LED's can be controlled by any DMX source, or by using our internal preprogrammed Macro patterns and chasers. The versatile tool for wall-wash, bi-color, eye-candy effects and light tubes. The individual LED's can be controlled by any DMX, Wireless DMX (Lumenradio® CRMX), via bluetooth by ROXX.APP, or by using our internal preprogrammed Macro patterns and chasers. 6 different sized, white light tubes can be attached to the FLEX series, creating stunning deco effects. Combining the two light sources will create spectacular fading colors or fire effects, due to the different ra-diation angles. To prevent the E.FLEX A.FLEX from theft a Kensington Security Slot is built inside.

3. GENERAL PRODUCT INFORMATION

3.1. Scope of delivery

- ⊖ 1x E.FLEX A.FLEX 1x
- ⊖ Safety-Eye bolt
- ⊖ 1x Single DC Power Supply

We're offering a wide range of professional accessories (optional). Please see under menu 6 or at our website www.roxxlight.com

3.2. Control Functions

- 3CH CCT, 8CH COLOR MACRO, 6/9/10/19/21CH RGB, 7/11/20/23CH DIRECT, 28/29CH PATTERN, 80CH PIXEL
- Stand Alone Functions including cinema effects, various auto programs, customisable scenes, CCT, LEE adjusted color macros and custom color templates (RGLB)
- Master & Slave (by DMX and Wireless DMX)
- Wireless DMX (Lumenradio CRMX®)
- ROXX App - Bluetooth 5.0

3.3. Features

4. INSTALLATION & SETUP

4.1 Physical Installation and Rigging

ROXX E.FLEX A.FLEX may be installed in any orientation. For this purpose the product provides several options:

Standing:

For vertical high beam illumination like typical wall washing effects, the fixture is designed to use directly without optional Yoke. An integrated tilt screw allows adjustments up to 12°.

The optional fixtures yoke with its implemented rubber feet is designed to ensure a secure stand on nearly every plane surface with every possible angle/orientation of the lamp's head. Please take care that supporting surfaces are loadable and stable.

Hanging:

A centric hole on the yoke's bottom (d=13mm / 0,51 inch) provides a mounting point for more rigging options like a (Mini-) TV Spigot, to use the E.FLEX A.FLEX on a tripod or for example with a superclamp.

Pendant Light*:

The sophisticated and attractive design of the ROXX® E.FLEX A.FLEX makes the luminaire predestinated for the use as a pendant light, e.g. for exhibition booths, galas,... The position of the safety eyelet and the lamp body balancing makes that possible in a perfect way. Included safety eye bolt for hanging down the E.FLEX / A.FLEX.

ⓘ Note:

To hang down the fixture as a pendant light with only one wire and without the need of a secondary safety the setup has to be done as a „stationary installation“. Please mounting material, that is not dismountable without tools (e.g. halfcoupler with nut and chain link).

Also in this application, please take care of the current requirements and regulations for dimensioning and design of the used wires, clamps and all other possible mounting materials.

⚠ Always take care of an adequate distance between the fixture and surrounding surfaces and be sure to keep the fixture free enough for good air circulation.

4.2 Anti-theft

To secure the FLEX headlamp against unauthorized removal, the housing includes a small opening through which a standard and commercially available Kensington® lock can be attached.

ⓘ *Note:

In order to provide protection from spraying water, in accordance with protection class IP65, special IP65-rated XLR connectors must be used correctly with the DMX input and output sockets.

4.3.1.2 Charging the battery, operating and storage

- As soon as the headlamp is connected to DC power and either the headlamp is switched off or the LED is not in operation, the internal battery starts charging.
- The battery charge status is shown on the display both when the headlamp is on and when it is in standby mode.
- The charging time from 0% charge status to 100% charge status is approximately 5 hours at E.FLEX and 3 hours at A.FLEX.
- The battery runtime is approx. 7.5 hours (E.FLEX) and approx. 5 hours (A.FLEX) for a two-color mix (both colors at 100%). The battery runtime can be extended up to 24 hours by using the runtime function with correspondingly reduced brightness.
- The headlamp automatically calculates the brightness based on the color setting and runtime used.
- After approximately 300 charging cycles (0% - 100%), the battery capacity is still approximately 70% of the nominal capacity.
- The electronic Battery Management System protects against overcharging and deep discharge.
- The battery may only be replaced with original accessories by an authorized service center.
- Do not charge the battery of the E.FLEX / A.FLEX headlamp at ambient temperatures below 0°C and above 40°C.
- When operating the E.FLEX / A.FLEX floodlight with mains voltage, the ambient temperature must not fall below 0°C and must not exceed +40°C.
- When operating with internal rechargeable battery, the ambient temperature must not fall below -20°C and must not exceed +40°C.
- Immediately recharge the battery completely after discharging. Batteries that are not fully charged lose capacity and service life.
- For short to medium-term storage of the headlamp, fully charge the battery.
- If the headlamp will not be used for a longer period of time, use the "Storage" function inside the device settings to charge the battery. This limits the maximum charging capacity to 40% and thus preserves the life of the battery.
- If the headlamps are charged inside a flight-case, be aware the case lid must remain open during the entire charging process in order to avoid heat accumulation.
- When operating in a cold environment, battery life may be shorter than expected.
- Store the headlamp in a cool, dry place to allow optimal storage conditions for the battery.

4.3.2. DMX Connection

The E.FLEX A.FLEX is fully controllable by DMX (USITT DMX512-A standard, based on RS-485) and RDM. It can be connected using either DMX cables or via the built-in LumenRadio CRMX wireless system.

4.3.2.1. Cable Connection

If using a cabled DMX system, connect the DMX IN cable to the input connector (male 5-pin XLR connector). Once you want to connect DMX Out at the same time, please use optional ROXX DMX I/O split cable (male/female 5-pin XLR connectors). For outdoor installations, use only IP65-rated XLR connectors.

Use shielded twisted pair cable designed for RS-485 devices. The cables are daisy chained between the fixtures, and up to 32 fixtures can be connected to the same DMX link. Up to 300 meters (1000ft.) of cable is achievable with high quality DMX cables. All DMX links must be terminated in the last fixture by connecting a DMX termination plug to the last fixture's 5 pin DMX out connector. Standard microphone cable is not suitable for transmitting DMX.

E.FLEX A.FLEX -DMX I/O
Cable (Optional)

4.3.2.2. Wireless Connection*

E.FLEX A.FLEX is equipped with a LumenRadio™ Transceiver module. This enables the fixture to work with the following connectivity options:

- ⊖ Working in Receiver Mode: receive wireless DMX- and RDM Signals via CRMX
- ⊖ Working in Transmitter Mode: transmit DMX (1 universe) to other units via CRMX
- ⊖ Full Control via Bluetooth 5.0 and ROXX App

The Fixture is able to send DMX-data received by CRMX or Bluetooth to its physical DMX-Output XLR Connector and hereafter, plugged in by cable, to any DMX-capable unit. For this please enable "Pass to DMX Out" inside Wireless DMX Settings.

B.FLEX/A.FLEX can act as a fully operative CRMX Receiver and be paired to an active wireless transmitter (CRMX) simultaneously as being connected to a cabled DMX. The device will prioritize cabled DMX input over wireless DMX and over Bluetooth. A small indicator in front of "DMX", "CRMX" or "BLE" gives an easy overview which protocol is currently active. Please see the display graphics below.

If using a wireless DMX system, ensure that the DMX input and the DMX output are properly sealed. Connect both DMX IN and DMX OUT, or seal, in order to maintain the fixture's IP65 rating.

ⓘ *Note: If you are using XLR for DMX and not Bluetooth we recommend to not connect to Bluetooth unless you need to since it can cause a few dropped DMX packets.

BLE and CRMX RX are not available simultaneously.

- If CRMX RX is enabled and BLE will be enabled after, CRMX automatically changes to TX mode.
- If CRMX TX operating mode is changed to RX, BLE will be disabled automatically.

5. OPERATION

5.1 Start up*

Once the fixture is switched On, the boot process starts and the following information will appear on the display: "Ready to ROXX", the product name and the current software version.

After this process, the fixture is ready for operation, and starts in the previously enabled mode.

5.2 Control Display*

ENTER OLED Display with Touch-Sensitive controls

ESC Press **ENTER** to access the selection menu for system settings or confirm changes.

▲ ▼ Press **ESC** to take a step back in the menu.

Press arrows to scroll up and down inside the menu and change values, such as DMX address.

***Note:**

For a smooth navigation thru the menu settings, please make sure the display surface is dry and dust free.

After approximately 1 minute of inactivity inside the menu settings, the display will automatically jump back to home screen.

5.3 Display Short Cuts*

Short Cuts

For some always recurring functions the fixture allows quick and user-friendly access at home screen over some display control short-cuts:

ENTER + ESC User Reset or Factory Reset*

Pressing ESC+ENTER simultaneously a Factory Reset or User Reset can be started.

By using the up/down arrows the Factory- or User Reset can be selected.

For confirming press ENTER, to jump back please press ESC.

***Note:**

After Factory Reset all fixture settings are set back to factory default values.

After User Reset all user selected reset functions and user default values will set back.

Also a short self-test will start immediately while dimming in and out each single color.

Display Off

Pressing ESC + arrow down simultaneously the display backlight function will set to off and the display will turn off immediately. Once a control is pressed the display backlight will turn on.

BLE enabled / disabled

Pressing ESC + Arrow Up simultaneously the Bluetooth will enabled or disabled. Confirm by pressing ENTER, step back by pressing ESC.

Manual display flip function*

Use the manual display flip function by pressing arrow up + arrow down simultaneously. The display will rotate 180. By pressing both arrows simultaneously again the display will flip back.

i *Note:

Once the display is flipped both Up / Down controls will work according to the display rotation.

Quick Light function

For easy and fast operation during setting the lights the fixture includes a user-friendly Quick Light function (Daylight 5600 Kelvin). If DMX, CRMX or Bluetooth is not assigned please press and hold ENTER for 3 seconds at homescreen, after the Quick Light function will appear.

Here dimmer can be adjusted from 0-100% by using up/down arrows, to take over the dimming value please press ENTER to confirm.

5.4 Configuration

Home Screen

After boot process the fixture is ready for operation and starts in the previously enabled mode. At home screen the following information will appear, depending on the current operating mode:

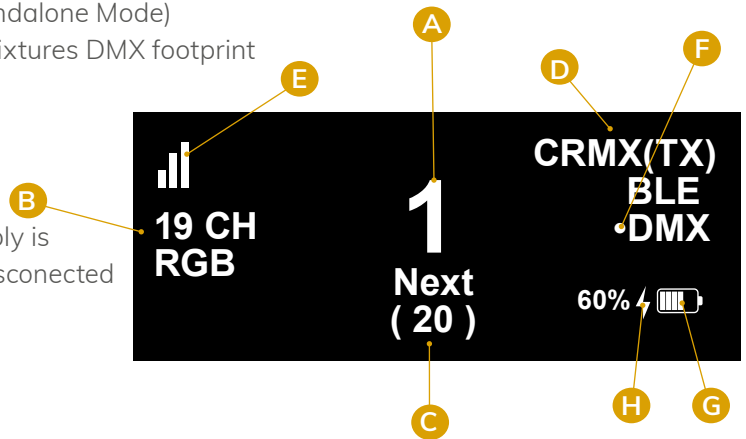

- A DMX Adress
- B Operating Mode (DMX Mode, Quick Light or Standalone Mode)
- C Next available DMX address depending on the fixtures DMX footprint
- D External Data protocol (CRMX, DMX, BLE).
- E CRMX status and strength
- F The dot indicates the active protocol
- G Battery Status
- H The flash symbole indicates that DC power supply is connected. It disappears if DC power supply is disconnected

Note:

CRMX (RX) CRMX Receiving Mode

CRMX (TX) CRMX Transmit Mode

BLE Bluetooth enabled

5.4.2 Selecting DMX Mode*

At home screen please press ENTER to access to the main menu (level 1).

While using UP / DOWN arrows, please select the menu item "DMX Mode" and confirm by pressing ENTER.

In the following sub-menu (level 2), you can now choose between 12 different DMX operating modes while using the UP/Down arrows and confirm by pressing ENTER or jump back by pressing ESC.

After confirmation the display will jump back to main menu (level 1). Press ESC for homescreen, here the selected DMX mode will be displayed.

ⓘ *Note:

For detailed information about the several DMX modes including channel assignment please see our DMX Control chart.

5.4.3 Stand Alone*

Press ENTER to access to main menu (level 1).

While using the UP / DOWN arrows, please select the menu item “Stand Alone” and confirm by pressing ENTER.

In the following sub-menu (level 2), you can now choose between 6 different Stand Alone operating modes (Auto, Editor, Color Macro, Quick Color, Tunable White, User Color) ,Stop Stand Alone, Timer and Color Settings functions while using the UP/Down arrows and confirm by pressing ENTER or jump back by pressing ESC.

To finally use Stand Alone programs please make sure either DMX, CRMX RX or BLE is connected to the fixture, as these protocols have priority.

Stop Stand Alone

To stop a running Stand Alone mode immediately, please select “Stop Stand Alone” and confirm by pressing ENTER. The display will automatically jump back to level 1.

Level 1

| Menu |

Auto*

Select “Auto” by using the up/down arrows and press ENTER. Here at sub-menu (level 3), you can choose between 40 different Auto Programs for Center / Halo only, Center & Halo together and Stop Program. Using the Up/Down arrows you can select one of the 40 auto programs and confirm by pressing ENTER or step back by ESC.

After confirming your preferred Auto Program, you can now adjust speed and brightness at level 4. To adjust speed, please use the UP / DOWN arrows to select the menu item “Speed”, and confirm with ENTER. After use UP / DOWN arrows to adjust the speed value between 000-100 and confirm by ENTER or jump back by ESC.

To adjust brightness please select "Dim" as per the procedure previously described and confirm with ENTER. After use UP /DOWN arrows again to adjust the brightness value between 000-100 and confirm by ENTER or jump back by ESC. Once it's confirmed or denied the display will automatically jump back to level 3.

To stop running a selected auto program please chose "Stop Program" at level 3 or "Stop Stand Alone" at level 2. For returning back to homescreen please press ESC three times.

At homescreen the selected Stand Alone mode "Auto" and the selected program will be displayed.

Note:

Using arrows UP /DOWN at homescreen Auto programs can be directly changed according to the list.

Editor*

At Editor you have up to three customizable programs which can be defined and run from the menus.

Each of the three values contains twenty four user-definable scenes with its own values for RGLB (RAW) or RGB (Calibrated) and shutter, playing continuously in a loop. Each scene has a definable fade-in time for the transition from one color to the other and wait-time.

To define a program please press ENTER to access to main menu (level 1).

While using the UP / DOWN arrows, please select the menu item "Stand Alone" and confirm by pressing ENTER.

Select "Editor" by using the up/down arrows and press ENTER.

Here at sub-menu (level 3) you can choose between Program 1-3, Dimmer and Stop Program.

Using the Up/Down arrows you can select program 1, 2 or 3 and confirm by pressing ENTER or step back by ESC.

After confirming your preferred program, you can now choose between Scene 1-24.

Select one of the scenes and press ENTER or step back by ESC.

At level 5 you can now set your color, shutter and fade / wait time in minutes and seconds. For creating a color jump please set value for "Fade Time" to 0, and "Wait Time" to at least 1 second.

Once it's set your first scene is programmed.

You can now jump back to level 3 by using ESC. Here your program will starts automatically.

For creating more scenes please use the same procedure.

To stop an active program please press ESC and select "Stop Program" at level 3 or "Stop Stand Alone" at level 2.

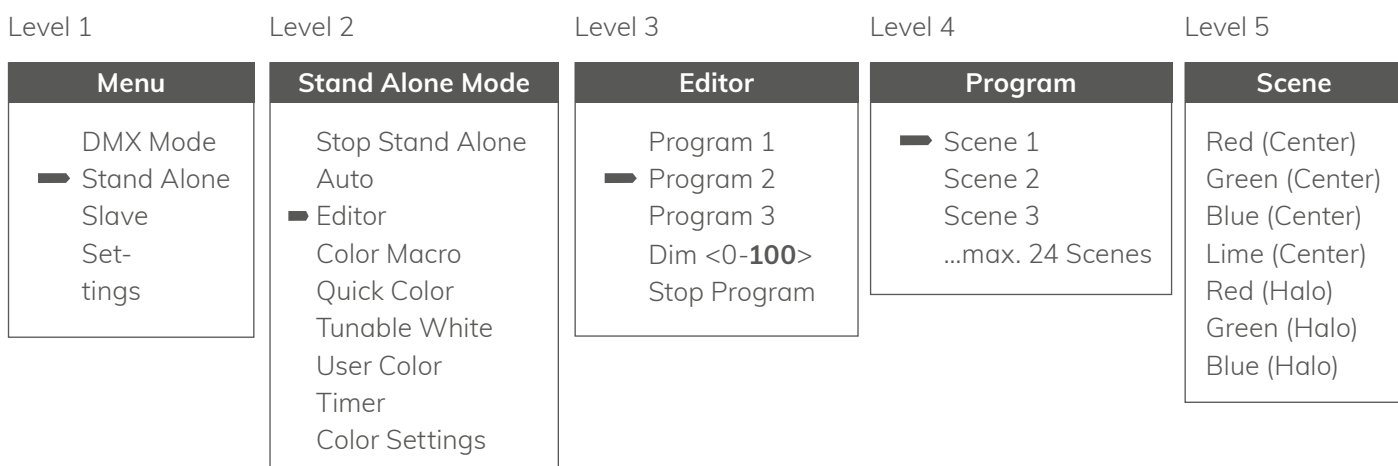

To start again, please re-select your preferred program, it will starts automatically again.

To adjust the master brightness for program 1-3, you can use the item "Dimmer" at level 3 and select between 000-100 and confirm by ENTER or jump back by ESC.

ⓘ *Note: Once "Color Calibration" is selected under "Color Settings" inside Stand Alone, only values for RGB for the center LED are available here.

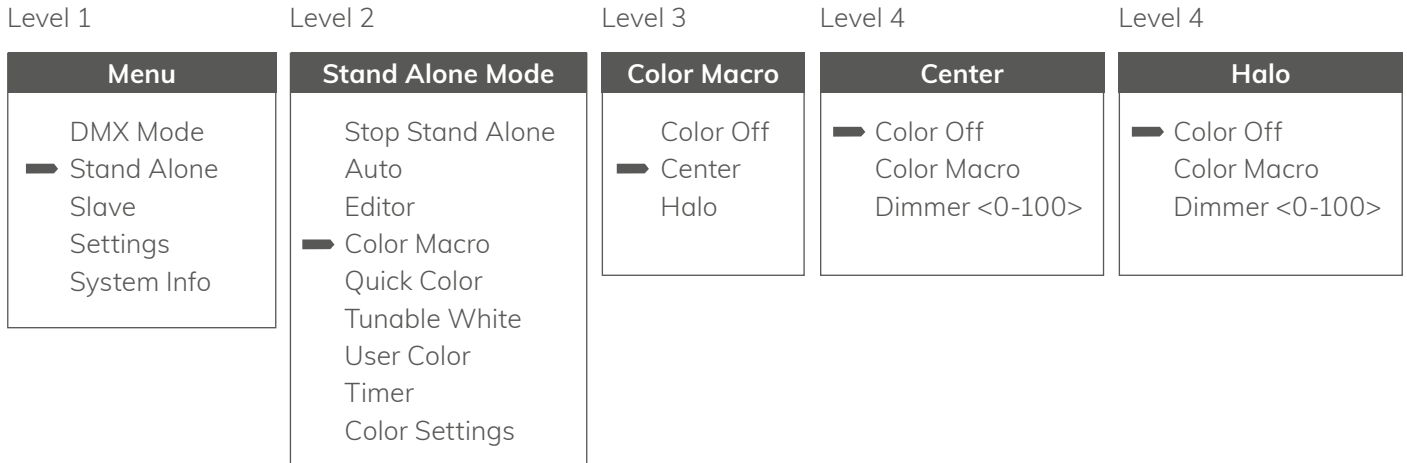

Using UP / DOWN arrows at homescreen Editor program can be directly changed according to the list.

For choosing the right strobe effect please follow the Strobe Channel from our DMX chart at the end of this manual.

Color Macro*

44 different color macros (34x matched LEE color filters, 4 LED colors and 6 different Whites) are available as presets. For each the brightness can be adjusted separately.

To select a color macro please press ENTER to access to main menu (level 1). While using the UP / DOWN arrows select the menu item "Stand Alone" and confirm by pressing ENTER. After please select the item "Color Macro" by using the up/down arrows and press ENTER again. Using UP and DOWN controls, select "Center" or "Halo" and confirm by pressing ENTER again. At level 4 select your desired color preset and confirm with ENTER, adjust the brightness for the color preset between 000-100. Confirm by ENTER. For color blackout choose the item "Color Off".

Note: Using UP / DOWN arrows at homescreen Color Macros can be changed according to the list.

| Blue (H) <0-255> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

To adjust your Quick Color please press ENTER to access to main menu (level 1).

While using the UP / DOWN arrows select the menu item “Stand Alone” and confirm

by pressing ENTER. After please select the item “Quick Color” by using the up/down arrows and press ENTER again.

Using UP and DOWN controls, select your desired color and confirm with ENTER.

After you can adjust the brightness for the color between 000-255 and confirm by ENTER.

Besides the individual color mix also a master dimmer for Center- and Halo LED can be adjusted between 000-100.

For strobe effects please adjust the Shutter value between 000-255.

ⓘ ***Note: Please see detailed explanation for strobe effects inside DMX chart at the end of this manual. If “Factory Calibration” is selected in “Color Settings” only R,G,B is available here.**

Using UP/DOWN arrows at homescreen you can change Quick Color’s dimmer value.

Tunable White*

The standalone mode “Tuneable White” allows the color temperature (CCT) to be adjusted from 2.000K – 10.000K in 100K steps. Besides brightness and shutter also a +/- green and magenta correction is available.

Starting from home screen press ENTER to access to main menu (level 1).
 While using the UP / DOWN arrows select the menu item "Stand Alone" and confirm by pressing ENTER.
 After please select the item "Tunable White" by using the up/down arrows and press ENTER again.
 Using UP and DOWN controls to select your desired menu item, confirm by ENTER and adjust the desired value by up and down controls and confirm all entries with ENTER.

ⓘ *Note:

Tint values

- 000** = no function/neutral
- 001 - 127** = + green
- 001 to - 127** = - green

ⓘ *Note: Using UP/DOWN arrows at homescreen the selected CCT value can be changed in +/- 100K steps.
Shutter: Please see detailed explanation for strobe effects inside DMX chart at the end of this manual.

Tunable White is only available for Center LED.

User Color*

The standalone mode "User Color" allows to store up to 5 customized color presets out of Red, Green, Blue and Lime,

| Level 1 | Level 2 | Level 3 | Level 4 |
|--|---|---|---|
| Menu | Stand Alone Mode | User Color | User Color |
| DMX Mode █ Stand Alone Slave Settings System Info | Stop Stand Alone Auto Editor Color Macro Quick Color Tunable White █ User Color Timer Color Settings | Color 1 Color 2 Color 3 Color 4 Color 5 | Dimmer (C) <0-255> Dimmer (H) <0-255> Shutter <0-255> Red (C) <0-255> Green (C) <0-255> Blue (C) <0-255> Lime (C) <0-255> Red (H) <0-255> Green (H) <0-255> Blue (H) <0-255> |

brightness and shutter.

To define a User Color please press ENTER to access to main menu (level 1).
 While using the UP / DOWN arrows, please select the menu item "Stand Alone" and confirm by pressing ENTER.
 Select the item menu "User Color" by using the up/down controls and press ENTER.
 Using UP and DOWN select your desired preset number (Color 1 -5) and confirm with ENTER.
 Use UP and DOWN controls to select your desired color, confirm by ENTER and adjust the value by up and down controls between 000-255 and confirm all entries with ENTER.
 With Dimmer for Center- and Halo LED you can adjust the allover brightness of your User Color. Shutter allows several strobe effects. Once your color mix is ready, jump back by ESC. Your individual color is stored under the selected color preset now.

ⓘ *Note: All five User Colors are also available by DMX at Color Macro channel. Using one of the RGB DMX modes, only User Colors mixed out of RGB values are available. For Direct modes, both RGB and RGBL User Colors are available.

For detailed information please see Color Macro Chart at the end of this manual.

Using UP/DOWN arrows at homescreen the Color Macros can be changed according to the list.

Shutter: Please see detailed explanation for strobe effects inside DMX chart at the end of this manual.

Timer*

Via the internal timer function, all Stand Alone modes except "Auto" and "Editor" can be conveniently faded in and out after the function is enabled in the previously activated standalone mode, without the need for an external controller. Also it remains active even the fixture is switched off and restarted. Simultaneously, the timer function is available via cable as well as via wireless DMX for master & slave operation.

The fade-in time can be set from 0 to 60 minutes, the dwell time from 1 to 24 hours and the fade-out time from 0 to 60 minutes.

| Timer <On / Off> |
| Fade In <0-60 min> 1 minute steps |
| Dwell Time <1-24h> 1 hour steps |
| Fade Out <0-60 min> 1 minute steps |

To select "Timer" please press ENTER to access to main menu (level 1). While using the UP / DOWN arrows, please select the menu item "Stand Alone" and confirm by pressing ENTER.

Select the item menu "Timer" by using the up/down controls and press ENTER. Now you can activate / deactivate the Timer function, select "Fade In", "Dwell Time" or "Fade Out" for the individual settings and confirm with ENTER.

In each case a three-digit number field will be displayed. Use UP and DOWN to set the value as required from 000 to 060 minutes for "Fade In" and "Fade Out", or 001 to 024 hours for the "Dwell Time". Confirm by pressing ENTER again.

After all time settings have been configured, please activate the timer function by selecting the submenu item "Timer On/Off" using UP and DOWN, confirm with ENTER, select "On" and confirm with ENTER again.

To disable the timer function, please select "Off" and confirm by ENTER.

ⓘ *Note: Please don't forget to select one of the Stand Alone modes for "Startup Mode" at "Settings".

Color Settings*

Here at "Color Settings" you can chose your preferred working color mode for all Stand Alone color modes. Either "Color Calibration" or "RAW". Full Calibration of R, G, B and L for a maximum of color consistency from unit to unit.

Please note If this function is activated only RGB is available at User Color and Quick Color. For a maximum of saturation please chose RAW mode.

5.4.4 Slave Mode*

Slave Mode allows same model fixtures to be controlled by the “Master” fixture via DMX or wireless DMX (CRMX). The “Master” device should run in Stand Alone mode, all “Slave” devices should set to “Slave”.

Level 1

| Menu |
|-------------|
| DMX Mode |
| Stand Alone |
| ▀ Slave |
| Settings |
| System Info |

To select “Slave” please press ENTER to access to main menu (level 1).

While using the UP / DOWN arrows, please select the menu item “Slave” and confirm by pressing ENTER. Now this unit is set to “Slave”. Please connect the slave and the master devices (same model) either with a DMX cable or via wireless DMX and enable one of your preferred standalone mode on the master device. Once the Stand Alone mode is activated all slave devices will follow the master device. For using Master & Slave function via wireless DMX (CRMX), please activate CRMX transmit function at Master unit and CRMX receive function at all “Slave” units.

For detailed CRMX information please read chapter “Wireless DMX”.

ⓘ Note: All devices should use same software version.

| | | Transmit Link | <no/yes> | Yes= pair with CRMX devices. CRMX must be activated on all devices and the pairing must be picked up by a transmitter (Receive Reset). No= Linking disabled | |
| | | Receive Reset | <no/yes> | Yes = retain transmitter pairing No = do not retain transmitter pairing | |
| | | Pass to DMX Out | <no/yes> | Yes= incoming wireless DMX and BLE signal will be passed to wired DMX out No= incoming wireless DMX and BLE signal will not be passed to wired DMX out | |
| | | Signal Strength | 0-100 | CRMX signal strength | |
| | | BLE | <on/off> | On= BLE enabled / Off= BLE disabled | |
| | | BLE Link | <no/yes> | Link = starts bluetooth advertising for at least 1 minute | |
| | | BLE Password | <000000> | Set 6-digits user Password for connection to your mobile device (ROXXAPP) | |
| | Battery | Runtime | 4 Hours | 4 Hours 6 Hours 8 Hours 10 Hours 12 Hours 14 Hours 16 Hours 18 Hours 20 Hours 22 Hours 24 Hours | "Off" for maximum of brightness. Set runtime in 2h increments, based on fully charged battery |
| | | | 6 Hours | | |
| | | Charging | Continuous | Continuous | Continuous : charging up to 100% capacity, for short and medium term fixture storage. |
| | Storage | | Storage | Charging up to just 40% capacity. Recommended for long term fixture storage and thus preserves the life of the battery. Once battery is charged to 40% the display backlight will be switched off automatically. | |
| | Display | Display | <on/off> | <on/off> | On= Flip control panel display by 180° (e.g. for overhead installation) Off= normal control panel display |
| | | Backlight | <on/off> | <on/off> | On= controls permanent on, display itself will deactivate after 60 minutes of inactivity Off= controls and display deactivation after approximately 1 minute of inactivity |
| | | Auto Lock | <on/off> | <on/off> | On= Automatically locks the controls after approximately 1 minute of inactivity. After attempted input the display shows: „Locked!“ Unlock process: press arrows up, down, up, down consecutively |
| | Startup Mode (using last adjustments of specific Standalone Modes) | DMX | | | Select your default operating mode when fixture is powered on |
| | | Auto | | | |

7. TECHNICAL DATA / DIAGRAMS

7.1 Technical drawings and measurements - E.FLEX

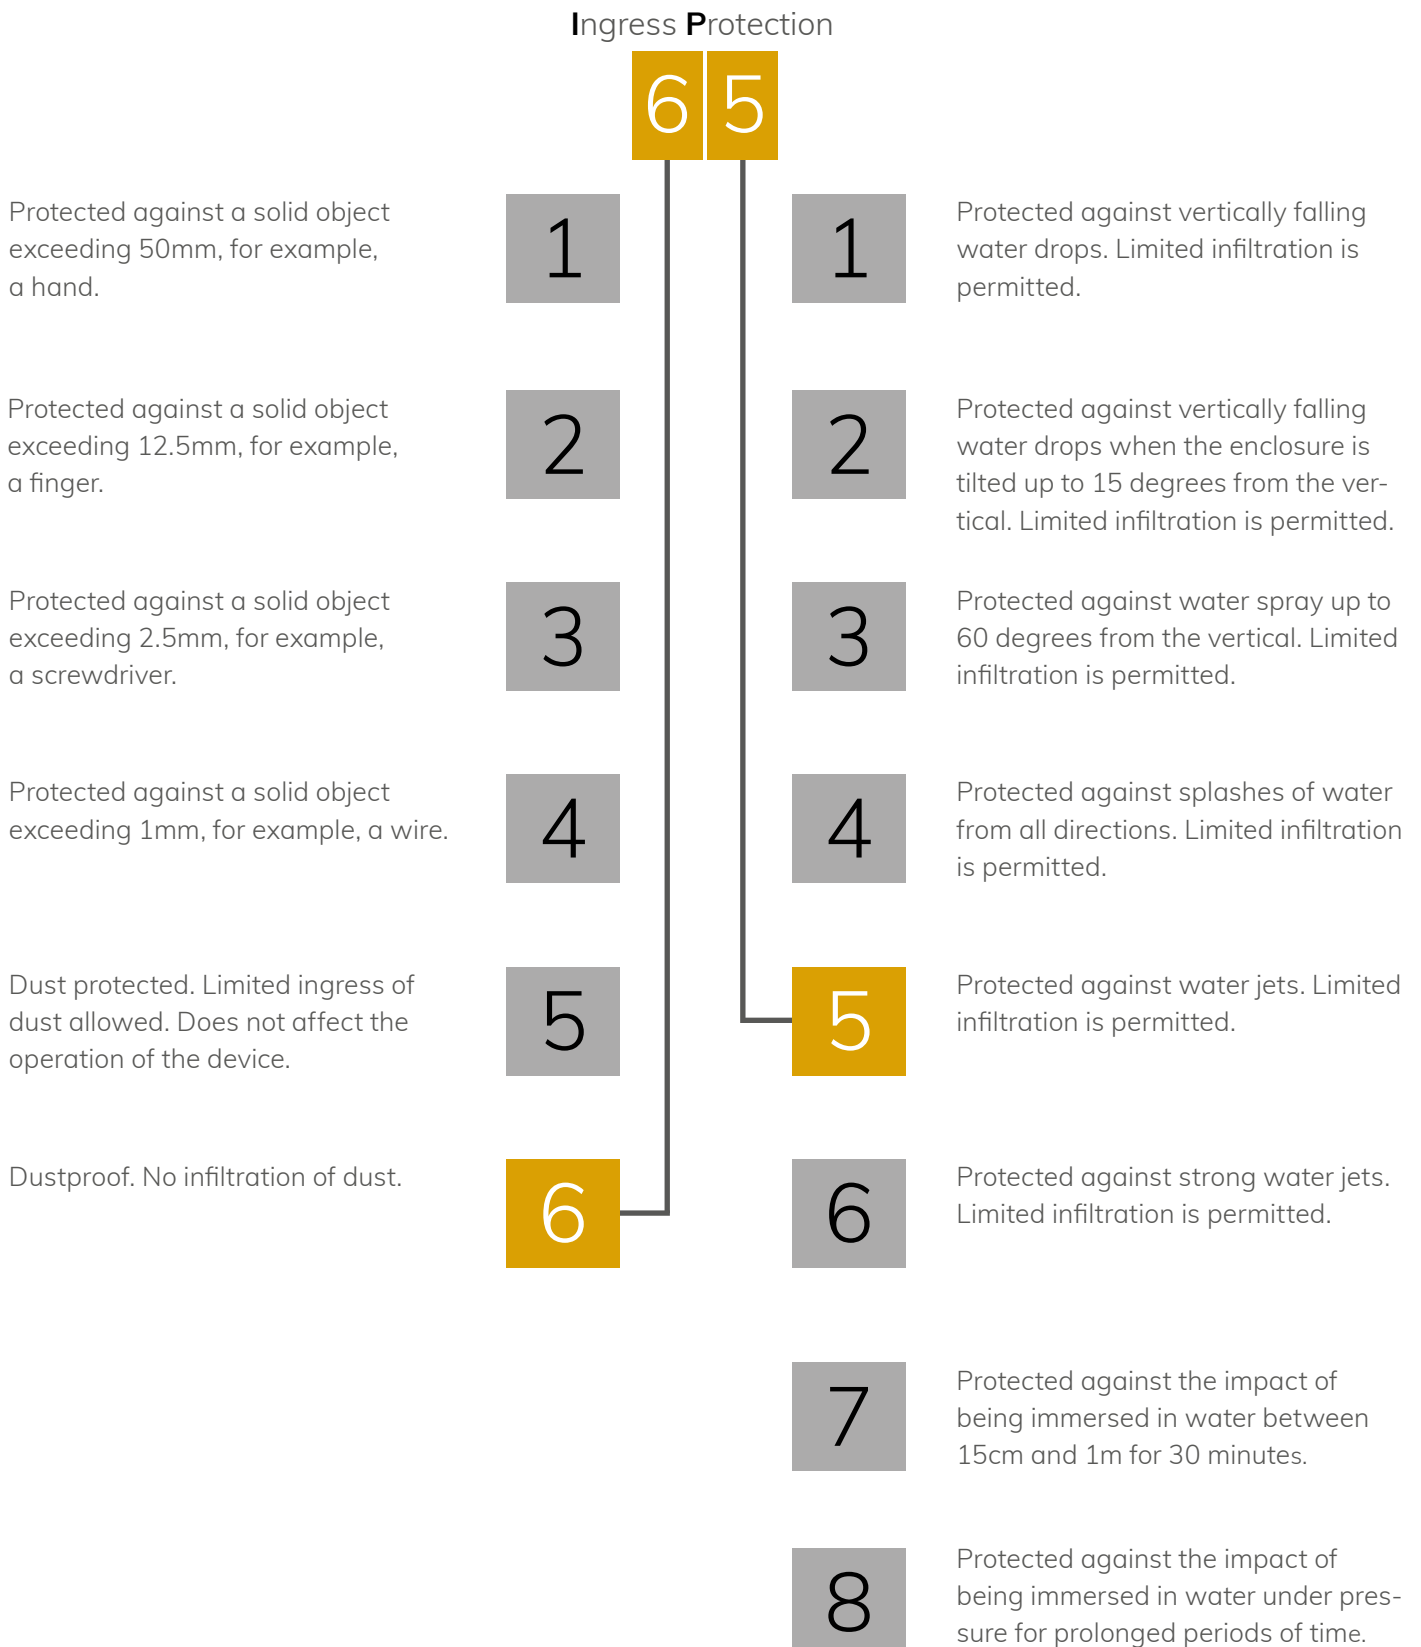

7. TECHNICAL DATA / DIAGRAMS

7.1 Technical drawings and measurements - A.FLEX

7.2 IP Rating

ROXX products conform to officially classified IP standard levels. E.FLEX /A.FLEXi is rated to IP65 when using the covers for the housing parts. IP stands for Ingress Protection and IP65, according to classified standard, means shielded against dust and high-pressure jets of water from any side.

7.3 Technical Data - E.FLEX

| Photometrics | |
|--|--|
| LED expected lifetime | 50.000 hours |

7.6 RDM Templates*

The ROXX Show series features support for various RDM functions.

RDM (Remote Device Management) is a protocol enhancement to USITT DMX512 that allows bi-directional communication between the fixtures and the controller over a standard DMX line. This protocol will allow configuration, status monitoring and management.

You will need a RDM controller to get control over the supported parameters. See the tables below for supported RDM features.

| | |
|------------------------------|---------------------------------|
| Label: | ROXX E.FLEX A.FLEX |
| Model: | E.FLEX A.FLEX |
| Manufacturer: | ROXX |
| ID: E.FLEX | 0X6a6a0128xxxx |
| ID: A.FLEX | 0X6a6a0129xxxx |
| Device ID (E.FLEX / A.FLEX): | 0128xxxxxxxxxx / 0129xxxxxxxxxx |

ⓘ *Note: During RDM identifying process E.FLEX /A.FLEX flashes white to blue color alternately.

RDM functions E.FLEX

For easy identifying ROXX E.FLEX during RDM process the unit will jump from white color to blue color every second.

Sensors

RDM enables various readouts for remote device monitoring. See the table below for sensors and sensor types. Please note: The RDM controller communicates with the fixtures to show only the available sensors for this fixture. The table is subject to change without notice.

| Name | |
|------------------|--------------|
| Temperature | xx°C / xxx°F |
| Software Version | SW-Version |
| Errors | |

7.7 Firmware Update

To update E.FLEX / A.FLEX to newest firmware, please use ROXX update box and make sure the fixtures are connected to DC power.

Please download update instructions here:
<https://roxxlight.com/support/>

8. TROUBLESHOOTING

Did you try turning the device off and on again?

| Problem | Reason | Solution |
|--------------------------------|---|--|
| Device is not responding. | No power. | Check cable connections and conform that power is switched on. |
| | Fuse defect. | Contact your qualified service technician / manufacturer. |
| Device has turned off. | Power failure or power was turned off. | Check power supply, fuse, connections, switches. |
| Device has stopped responding. | DMX cable correct? | Check cables. |
| | Wireless connection got cut off. | Check wireless transmitter and connection signals. |
| Device operates strangely. | DMX cable inverted (pins correct?) | Use a phase inverter or different cables. |
| | DMX cable terminated? | If not, install DMX termination at the end of the cable. |
| | Stand Alone program running? | Stop internal Stand Alone. |
| No Bluetooth Connectivity | No Bluetooth Connectivity | Please make sure your mobile device is inside the connectivity range of maximum 10-15m. |
| | Bluetooth is disabled at your mobile device | Please enable Bluetooth at your mobile device settings. |
| | Mobile device has wrong Bluetooth Pin | Please use same Bluetooth Pin to connect ROXX. APP with the fixture. Current BLE Pin can be read out inside fixture's wireless DMX settings. |
| | Mobile device has different Bluetooth connectivity | As only one Bluetooth connectivity can be active, please make sure your mobile device is currently not connected to some other devices. |
| | Different mobile device is still connected to the fixture | Please disconnect other mobile device from fixture. |
| | No Bluetooth Advertisement | Please send new BLE advertisement by enable "BLE Link" inside Settings of the fixture. |
| | Bluetooth module has hang up | Please enable Factory Reset at the fixture to re-start the Bluetooth module. |

9. MANUFACTURER'S DECLARATION

Manufacturer's Warranty & Limitations of Liability

Please find our warranty conditions and limitations of liability inside our manufacturer's declaration at www.roxxlight.com/support

Requesting Warranty-Service

To request warranty service for your product, please contact:

ROXX GmbH,

Hansestr. 91, 51149 Köln

Email: info@roxxlight.com or the ROXX authorized reseller in your country, from where you purchased your product.

Correct Disposal of this product

This is for the European Union and European countries with electrical waste collection systems. When this label is shown on the product or brochure it means that the item cannot be disposed with household waste. In order to prevent damage to the environment or human health please do not dispose this product uncontrolled. Make sure to act responsible, recycle this product separately from other types of waste to enable lasting reuse of resources. Private users please contact the retailer where you purchased this product or your local authorities to find out where and how proper recycling of this item is possible. Business users please contact your supplier or check the terms and conditions of your purchasing contract. Make sure not to mix this product with other commercial waste.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CE Compliance

The equipment marketed by ROXX GmbH complies (where applicable) with the essential requirements and other specifications of the following Directives:

- 2014/53/EU (RED)
- 2014/30/EU (EMC)
- 2014/35/EU (LVD)
- 2011/65/EU (RoHS)

The complete EU- and UK-Declaration of Conformity can be found at www.roxxlight.com/support, or you can also request it at info@roxxlight.com
