Attention

- [1] All permissions to be reminded when downloading the app must be turned on.
- [2] It is recommended to restore the factory settings before configuring the new camera.

Method to restore factory settings:

- [1] After the camera is powered on, press and hold the reset button for about 8 seconds. When the indicator light turns to blue light off and red light flashes slowly, the device successfully restores the factory settings.
- [2] Before setting up the camera, please plug it in and turn it on, and set it within the range of the router's strong Wi-Fi signal.
- [3] The memory card needs to be inserted when the camera is turned off (the memory card format needs to be FAT32)
- [4] It is normal that the mobile phone cannot access the Internet after connecting to the camera's hotspot. The camera's hotspot is only to help connect and watch the pictures taken by the camera at close range

Indicator light description

- [1] The factory is not restored, the blue light and red light alternately flash quickly
- [2] Reset is complete, blue light and red light is off
- [3] The reset is successful, the network is to be configured the blue light is off, and the red light flashes slowly
- [4] The network is not configured, the blue light is off, and the red light is always on
- [5] The configuration network is abnormal, the blue light flashes quickly and the red light is always on
- [6] When configuring the network, the blue light flashes quickly and the red light is off
- [7] The network is configured successfully, the blue light is always on and the red light is off
- [8] During the equipment upgrade, the blue light flashes slowly (interval 0.5 seconds) and the red light is always

[3] After enabling motion detection, return to the previous page, find the wake-up setting and click on

Product warranty terms

Dear users:

Hello, thank you for choosing this product, please read the following terms carefully before using this product

1 The warranty period of this product is one year from the date of purchase (subject to the valid proof of purchase)

During the warranty period, the company will provide free repairs for any faults caused by the quality of the product tself under normal use:

- [2] The following situations do not belong to the scope of free maintenance services:
- Damaged by the user due to improper transportation use, and management;
- Disassemble the product by yourself;
- Damage caused by accident, abuse, misuse, flood, fire or other natural disasters or due to improper use or unreasonable maintenance (including damage due to external force);
- The product is out of warranty;
- [3] If the returned product does not comply with the terms of this warranty, if repair is required, the company will charge the corresponding fee.;
- [4] The after-sales service after the warranty period, we will charge the corresponding maintenance cost and replacement parts cost according to the minimum standard each time;

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

•Reorient or relocate the receiving antenna.

•Increase the separation between the equipment and receiver.

•Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

•Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

To comply with FCC RF exposure compliance requirements, this grant is applicable to only mobile configurations. The antennas used for this transmitter must be installed to provide a separation di stance of at least 20cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.
