**PACKING LIST**

1. Magnetic wireless charging x 1 2. User manual x 1 3. Type-C quick charging cable x 1 4. Adapter x 1

**FAQ**

**1. If you're experiencing interrupted or slow charging, check the following:**  
(1) The back of your phone should not have any metal, pop sockets, or credit cards.  
(2) Put the phone in the center of the charging surface. This lets the charging coil in your phone line up with the one inside the wireless charger.  
(3) Phone cases should be no thicker than 5 mm for effective charging.  
(4) Check whether the adapter is DC 3.0 fast charger.

**2. If you're failing to charge your device, please try out the following:**  
(1) Please reset your old phone and test with other Type-C charging cable.  
(2) Please check whether the indicator turns on or not.  
(3) Please check the adapter is QC2.0 Quick Charger (Output 9V/2A) or not, iPhone original adapter does not match the wireless charger.  
(4) Please check your Phone case (thickness<=0.5mm). Metal ring or Magnetic Pad will not be suitable.

**3. If you're using the recommended wireless charger with the QC3.0 Adapter and have removed any potential charging obstructions, but are still experiencing issues, try the:**  
(1) Repeating the steps connecting your wireless charger.  
(2) Rebooting your phone.  
(3) Unplug the adapter and reset it.

**4. If the LED light flashes and the wireless charging stand cannot charge your device, here are 1 dealt with this problem?**  
1. Before using this wireless iPhone charger, please make sure that your device supports Qi wireless charging function.  
2. Check whether the 3.0 adapter is used for charging.  
3. Check whether there are metal foreign matters in the shell of your equipment. Magnetic and metal accessories will flash the LED and prevent charging.

**5. Charging slow.**  
Charging efficiency depends on the receiving power of your devices, and do not keep those apps keep running during charging.

**6. The phone is charging intermittently, or the indicator light flashes.**  
If the charging current is not enough, please use an adapter with sufficient power 9V/2A or 12V/2A above.

**7. Charging fever.**  
It is normal for the receiving coil or transmitter board to generate heat during wireless charging. If the wireless charger is too hot, please take your phone off it, when the wireless charger is cooled down, please charge it again.

**8. The charger does not work.**  
Do not put metal debris or magnetic cards on the charging area. If the product does not work due to overheating, please take off the phone and charge it again when it is cooled down.

**9. For iPhone 13/12 series phone can not be charging?**  
1. If you are using iPhone 13 / 12 series, but you can't charge it, please try restarting your phone and charging again.  
2. If your iPhone cannot be charged, it may be due to the iOS Version. Please try restarting your phone to solve this problem.

**10. If there are another problems, please contact our after-sales for solution.**

**TIPS**

- This 3-in-1 wireless charging station only supports Apple watch 57 / SE / 56 / 55 / 54 / 53 / 52. Other Apple watch series is not supported.
- Do not charge the charging station of Apple products from the computer USB interface or other power connectors.
- When charging, place the Qi enabled device in the center of each wireless charging area.
- Make sure your device is in the middle of the cordless charging area.
- The silicone shell of Watch and AirPods may cause abnormal charging. It is best to take it off before charging.

**WARNING**

- Avoid using the product at places that are wet, humid or have high temperature.
- Avoid dropping the product from high places.
- Do not disassemble the product by yourself. Please contact us if necessary.
- Do not clean the product unless the unit is powered off.
- It is recommended to use 16W or above adapter to charge 3 smart devices at the same time.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

#### Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
