

atomi smart

Smart WiFi Outdoor Floor Lamp

Connection Guide

Step 2 of 2

1

Scan the QR code below

or go to <https://atomismart.com/app/>

Get the app

Download the Atomi Smart app from the App Store or Google Play.

2

Register

Follow the on-screen instructions and register an account.

Make sure to allow access to Location (Android), Bluetooth® and Local Network (iOS).

3

Turn on your Atomi Smart device

And confirm that the light is flashing white.

If not flashing, press and hold the Power button for 10s to reset.

4

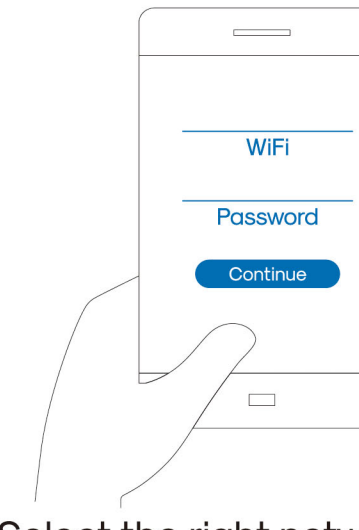

Add your Atomi Smart device

Press "Add Device" or the "+" sign and select "Connect Device" on the pop-up that appears.

If the pop-up does not appear, close the app and try again. Still nothing? Read the "Troubleshooting" section in this user guide.

5

Select the right network

Enter your home WiFi name and password, then press "Continue".

Make sure you're connected to a 2.4GHz WiFi network (Atomi Smart can't connect to 5GHz networks).

Smart WiFi Outdoor Floor Lamp

Troubleshooting

The pop-up does not appear when adding a device.

Make sure that you are allowing the app to access your phone's Location (Android), Bluetooth® and Local Network (iOS). For more details, visit our website's Support page.

If the pop-up still doesn't appear, follow the steps below:

1. Press "Add Device" or the "+" sign and select your Atomi Smart device.
2. Follow the on-screen instructions (Make sure you connect to a 2.4GHz WiFi Network).

I can't find the atomi-smart-XXXX network in my WiFi list.

Make sure your Atomi Smart device is powered on and the light is flashing white. If not, reset your device.

My WiFi network doesn't appear in the Atomi Smart app.

Use your smartphone to confirm that you have at least two WiFi bars in the vicinity of your Atomi Smart device. If not, move your Atomi Smart device closer to your router. (The list will refresh every 10 seconds).

Cannot connect to my WiFi network.

Make sure that you have entered the correct WiFi password during the WiFi setup. Check if there are problems with your internet connection. If the WiFi signal is too weak, reset your WiFi router and try again.

I'm getting "Failed to Add Device", "Failed to find router" or "DHCP" error.

- Confirm that your phone is connected to a 2.4GHz WiFi network.
- Check whether the router password you entered is correct.
- Confirm that the DHCP service is enabled on your router settings.
- Make sure that your WiFi signal is strong.
- Temporarily disable your 5GHz network.
- If you have a mesh network/router that does not allow you to disable 5GHz, try to move farther away from your router until your phone moves to the 2.4GHz band.
- For more Connection Troubleshooting tips, visit atomismart.com/connection-troubleshooting/

My Atomi Smart device appears as "Unavailable" or "Offline" in the app.

Refresh the device list.

I just replaced my router.

If you replace your router, you will need to reset your devices and add them again to the app.

How to reset my device?

Press and hold the Power button for 10s. Confirm that the light starts flashing.

How to control multiple lights simultaneously?

- Open the Atomi Smart app and select one of the outdoor lamps that you've added.
- Press the 'Edit' button on the top-right corner of the screen.
- Press 'Create Group' and select your lights.
- Press 'Save'. You can now control your outdoor lamps simultaneously.

 - c. the inability to redeem promo code due to technical issues.

FCC Notice:

This device complies with Part 15 of the FCC Rules. Operation is subject to the two following conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement

The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located for operating in conjunction with any other antenna or transmitter.

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This

equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution:

Modifications not approved by the party responsible for compliance could void user's authority to operate the equipment.
