

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of the EUT housing. The housing is open, revealing a black printed circuit board (PCB) with various electronic components, including a battery, a microcontroller, and a connector. The components are mounted on the PCB. A ruler is placed next to the housing for scale, showing the dimensions in centimeters and millimeters. The background is a blue textured surface.
Solder Board-Component View 1	 A close-up photograph of the solder board-component view. The image shows a small, rectangular PCB with various electronic components, including a microcontroller, a battery, and a connector. The components are soldered onto the PCB. A ruler is placed next to the board for scale, showing the dimensions in centimeters and millimeters. The background is a blue textured surface.

Solder Board-Component View 2	 A photograph showing a small, rectangular electronic component (likely a microcontroller or sensor) mounted on a blue textured surface. The component is positioned next to a metal ruler for scale. The ruler has markings in centimeters (0 to 8) and millimeters (0.5 mm to 8 mm). The component is small, with a red wire extending from it.
Solder Board-Component View 3	 A photograph showing a rectangular electronic component (likely a battery or power management IC) mounted on a blue textured surface. The component is positioned next to a metal ruler for scale. The ruler has markings in centimeters (0 to 10) and millimeters (0.5 mm to 10 mm). The component is white with gold-colored contacts and has a red wire extending from it.
