wireless charger

Product overview

JJT-A32 is a 3-in-1 wireless charging device. This product supports wireless charging for Apple Watch, including 2 apple heads, one apple earphone and one iPhone. This product adopts international leading and cost-effective wireless charging scheme, supporting PD protocol and QC3.0 protocol quick charge adapter, support 5V/3A addapter.

Charging method: electromagnetic induction
Input voltage and current: 5V-3A
Watch wireless charging output power: 1~3W
Mobile phone charging power: 10W
Headphone charging power: 5W
Standby power consumption: 60mW
Conversion efficiency: < 90%
Origin: Shenzhen, China

Scope of product adaptation

Apple headphones /Airpods 2 /Airpods 3 /Airpods Pro
Apple Watch 1-7 generation, SE generation
Apple mobile phone

Attention

1. This product is only suitable for charging iPhone, Apple Watch, Apple earphone and other related devices.
2. This product needs to be adapted with QC.30 or PD protocol, otherwise it may not reach the maximum charging speed of the product.
3. This product has over current protection, over voltage protection, short circuit protection.
4. Avoid using in direct sunlight, high temperature and water source, so as not to cause product damage.
5. Do not let children use this product alone.

Using directive

Model: JJT-A32

- 1.Charging area for iWatch
- 2.Mobile phone support frame
- 3.The output of iPhone
- 4.Charging apple headphones
5. Type - c input
- 6.color: Black/white
- 7.Weight: 105g
- 8.Size: 188*86*15mm

FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
