User Manual

5 in 1 Wireless charging/clock/night light

- Wireless charging
- Alarm clock
- RGB LED night light
- Smart phone holder

Thank you very much for choosing our product
Please read the User Manual carefully before using the product

Features

- Night light.
- Clock alarm.
- Wireless fast charging.
- Charging distance ≤ 6mm.

Appearance features

- ① Smartphone magnetic wireless charging station
- ② AirPods wireless charging station
- ③ iWatch wireless charging station
- ④ RGB LED night light
- ⑤ Clock display area
- ⑥ Charging indicator
- ⑦ Type-C input interface

How to operate

- Connect the USB port of the USB cable to the 30W charger and connect the Type-C port to the wireless charger. The working indicator light flashes red and blue alternately, and the red light remains on for a long time to indicate that the device is normal.
Note: This product requires a 9V/3A adapter. The 4-core TYPE-C data cable over 3A does not support 5V ordinary adapters. If you use an ordinary 5V adapter, it will not work properly.
- Place the smart phone in the magnetic wireless charging position, and the charging indicator light shows a blue light that remains on until it enters the charging state.

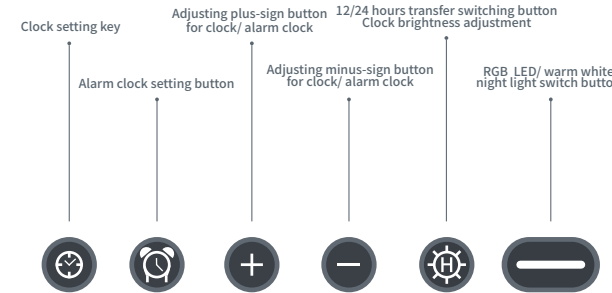

Night light function

- 1. Once touch LED night light switch to turn on the warm light.
- 2. Second touch it to changed RGB colorful LED night light.
- 3. Touch it again, switch to turn off the LED light.

Key Function

- Please keep this product away from water or other liquids.
- If you want to clean this product, please turn it off.
- Product working environment temperature range: -20-35°C.

FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled

environment. This equipment should be installed and operated with a minimum distance of 20cm

between the radiator & your body. This transmitter must not be co-located or operating in

conjunction with any other antenna or transmitter.
