六. 给你的 LAVA ME 3 换弦和微调

VI.Change strings and fine-tune your LAVA ME 3

如何换弦

How to change strings

如何换弦

How to change strings

当琴弦使用过久，我们可能需要更换新的琴弦。

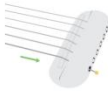

When the strings are used for too long, we may need to replace them with new ones.

1

扭动弦准，将琴弦扭松，将琴弦的头部（只有金属线的一端）从弦准上取下：

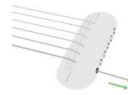

Twist the tuner, loosen the string, and remove the head of the string (only one end of the metal wire) from the tuner;

2

握紧琴弦，往琴身尾端轻推，琴弦尾部的小球从琴桥后方穿孔露出：

Hold the strings tightly and push them towards the end of the body. The small ball at the end of the string is exposed from the threading hole at the back of the bridge;

3

手抓琴弦尾部的小球，往后拉出琴弦：
Grasp the small ball at the end of the string and pull the string back;

4

将琴弦的头部，从后往琴头方向，穿过琴桥的穿孔：
Pass the head of the string through the threading hole of the bridge from the back to the head;

5

再穿进弦准的小孔内，并扭动弦准，让琴弦绷紧。
Then thread into the small hole of the tuner and twist the tuner to make the string tighten.

微调节方式

Fine-tuning

微调节方式

Fine-tuning method

琴颈整体无须调整，但可根据你的喜好，微调节琴弦与指板间的高度。

There is no need to adjust the whole neck, but you can fine-tune the height between the strings and the fingerboard according to your preferences.

1

扭动弦准，松开 6 条琴弦，至琴桥上的下弦枕能轻松取出：

Twist the string, and loosen 6 strings until the bone on the bridge can be easily taken out;

2

准备一张 800 目的砂纸，抓紧下弦枕顶部，将下弦枕底部在砂纸上轻轻打磨：

Prepare a piece of 800-mesh sandpaper, grasp the top of the bone, and lightly polish the bottom of the bone on the sandpaper;

3

根据你需要调整的弦距，调整下弦枕的高度。

According to the brace height you need to adjust, adjust the

★当下弦枕调低，弦枕将会相应降低。

★After the bone is lowered, the nut will be reduced accordingly.

在调整过程，请缓缓打磨，然后放回回琴桥上，尝试触感。

During the adjustment process, please polish slowly, and then put it back on the bridge to try the sense of touch.

切勿一次调整过度，下弦枕过矮，将无法感受最佳弹奏体验。

Never over-adjust at a time. If the bone is too short, you will not be able to feel the best playing experience.
