Every Spy Mission Is Possible with the Super Spies Secret Agent Spymaster Kit!

Packed with intelligent spy-wear essentials designed to carry out top-secret surveillance and espionage activities, our undercover detective kit will help you crack the case like a PRO!

The following are included for enjoyment of all your Secret Agent activities:

- Eavesdrop ... with a cool **Listening Device**.
- See from afar ... with **Light-up Spy Goggles**.
- Write undetectable messages ... with an **Invisible Ink Pen**.
- Detect suspicious movement ... with a **Motion Detector Alarm**.
- Send projectiles flying toward your targets ... with a top-flight **Detonator Disc Launcher**.
- Keep 'em all handy... on a neat **Utility Tool Belt** around your waist.

The Secret Agent Spymaster Kit includes all the gadgets that Super Spies need to execute counterintelligence schemes, collect intel, and pull off tactical strategies.

When Duty Calls ... Solve the Mission with Super Spies State-of-the-Art Stakeout Toy Kit!

Everything you need to be a Master Spy! The Super Spies Secret Agent Packaging Content:

To begin your Secret Agent journey, you need to acquaint yourself with the tools that the Super Spies Secret Agent Kit contains. Carefully remove each unit and read through the included instruction manual thoroughly.

215.90 mm

Utility Tool Belt

The adjustable **Utility Tool Belt** is the prime component that holds all your spy gadgets and provides an essential spy look.

Install all the devices on your Utility Tool Belt with their respective clips and wear the belt either cross-body or around your waist.

The **Motion Detector Alarm**, **Listening Device**, and the **Detonator Disc Launcher** are designed to have stationary slide-in and slide-out clips to ensure optimal mission efficiency and maximum comfort for all spy actions. Keep your belt intact on your body. Just slide in the required gadgets when needed.

Keep all your gadgets facing the same outward direction on the belt and position the belt in front of your body for quick access to any essential spy unit.

License-to-Spy Agent Badge

To install the **License-to-Spy Agent Badge** on your **Utility Tool Belt**, begin to slide the belt through one end of the badge. Slide the belt all the way to the other side of the badge, then move the badge to its perfect position on your belt.

You can choose to leave the **License-to-Spy Agent Badge** on the **Utility Tool Belt**, or to remove the badge. To remove it, simply pull the badge across the belt until the badge slides off the belt completely.

Motion Detector Alarm

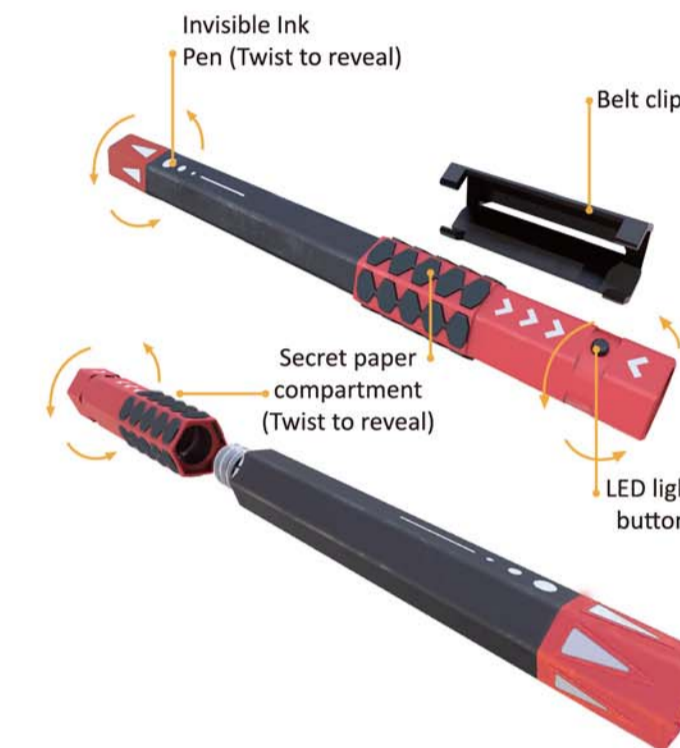

To begin your mission with the **Motion Detector Alarm**:

1. Open the battery compartment at the bottom of the unit and install 2x AAA size batteries.
2. Place the **Motion Detector Alarm** next to a door or touching a hallway wall. Make sure the invisible beam crosses the path.
3. Switch the unit on – the switch is located under the unit.
4. Check the unit by passing your hands in front of the detector.
5. When an object or person moves in front of the probe, the covert **Motion Detector Alarm** begins to ring, and the indicator light will turn on.
6. In case the alarm does not ring, make sure the detector is not already covered or blocked.
7. When not using your unit, make sure to turn it off to prolong battery life.

To attach your devices to the Utility Belt, slide them into their respective bases and slide the belt through the 2 slots on the bottom of the base.

Undetectable Invisible Ink Pen
If you have a secret paper to hide or need to read or write text in invisible ink, your **Invisible Ink Pen** is the perfect tool for secretive communication:

To hide a secret paper

1. Twist the red cap of the pen from the back body and pull to reveal the secret opening.
2. Roll your secret paper into a thin roll and insert it into the empty cylindrical cavity.
3. Insert the other end of the rolled paper into the red cap and close the unit by twisting it back into place.

To detect text written in invisible ink:

1. Write or receive a message written with your **Invisible Ink Pen**.
2. Press the button at the top of the red part of your pen.
3. Shine the LED light on the secret message and read the (now visible) text.
4. Send the secret message to your fellow spy!

To attach your pen to the **Utility Belt**, slide the belt through the clip slot on the top part of the unit, just like attaching other unit clips.

Please note: Batteries are already installed in your **Invisible Ink Pen**.

Listening Device

Your **Listening Device** consists of two parts:

1. Sound Transmitter
2. Sound Receiver

To begin your discreet listening mission:

1. Install 2x AAA batteries in the sound transmitter and 2x AAA batteries in the sound receiver
2. Turn the black switch to the ON position on the receiving device
3. Place the cube-shaped listening transmitter discreetly at the target location
4. The chips within the two listening devices initiate a connection
5. The indicator lights on both the receiver and transmitter blink until a connection is established, then the lights will remain illuminated when successfully connected
6. Ensure a distance of 15 meters between devices for best results

To attach your devices to the Utility Belt, slide onto their respective bases and slide the belt through the 2 slots on the base.

Light-up Spy Goggles

The **Light-up Spy Goggles** let you execute your secret spy missions in the dark and equip you with an authentic secret spy look. There is one easy step to begin using your **Light-up Spy Goggles**:

1. Toggle the switches on either side of the goggles' temples to switch the LED light on or off

To install your **Light-up Spy Goggles** on the Utility Belt, fold the goggles across the belt.

Please note: Batteries are already installed in your **Light-up Spy Goggles**.

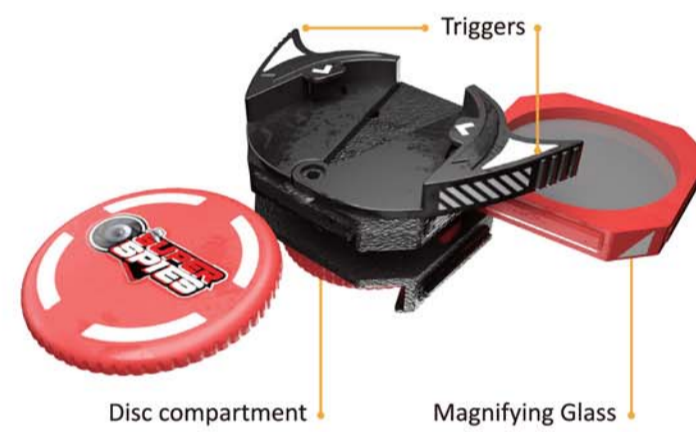

The Detonator Disk Launcher

Have you teamed up with a friend in your secret spy mission?

The **Detonator Disc Launcher** is just the right equipment to attack your adversaries! To begin detonating the discs:

1. Take a round disc from the bottom
2. Insert the round disc at the top by sliding it lightly until you hear the clicks
3. Squeeze both wings inward, towards the middle of the unit
4. The disc pops out at the front of the unit toward your target
5. Store extra discs underneath the launcher for fast re-loading!

Magnifying Glass

Rotate the detonator's second layer to use as a magnifying glass.

Battery Information

1. Always ensure you are using a fresh pair of AAA batteries for all your devices.
2. Both the Invisible Ink Pen and Light-up Spy Goggles come with batteries installed. If replacement is needed, replace with AG3 LR41 button cell batteries.
3. Do not mix old batteries with new ones.
4. Always remove batteries from your units to ensure the long life of your Super Spies Secret Agent units.
5. Follow the polarity symbols while installing/replacing batteries.

6. Do not short circuit battery terminals.
7. Ensure proper disposal of dead batteries according to your state/country laws.

Batteries Required

- 2x AAA Motion Alarm Detector
- 4x AAA Listening Device
- 3xAG3 LR41 button cells Invisible Ink Pen

Advice to Parents/Guardians

Ensure:

1. Ensure supervision while changing batteries.
2. Perform regular unit inspection. In case of damage, replace the unit.

¹We recommend safe unit usage. Avoid dropping, bumping or smashing the tools to ensure longer life of your Super Spies Secret Agent Spymaster Kit

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

IC Statement

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- This device may not cause interference, and
- This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
