Initial configuration

First download & install the App CO-FIT, and create an account to make sure the watch can synchronize the data it collects with the App.

On the APP, you can check the movement data of the watch for the day, setting sports goals and many other very interesting content.

Connect the watch to your mobile phone

CO-FIT APP supports the operating systems of IOS11.0 or Android 5.0 or above, and Bluetooth 5.0. It is available for more than 150 smart phones.

1. Turn on the Bluetooth on the watch and mobile phone.

2. Download APP: CO-FIT

App Store:CO-FIT

Android:CO-FIT

CO-FIT

3. After installing the APP, enter the home page.

4. Follow the instructions on the screen to connect or pair the smartwatch to the mobile device.
When pairing, make sure that the watch and mobile device can communicate with each other (synchronize data).
Open APP> Device> Add A New Device> Select CT-S2
5. Select the Bluetooth name CT-S2 with the strongest signal from the list. Then the watch will show pairing notification, click to confirm pairing. Then you will see the Bluetooth icon on the right top on the watch is blue and you have connected the Bluetooth 5.0.

(You need to use Android 5.0+ or iOS 11.0+ and above and the watch can only be paired with one mobile phone. To pair other mobile phones, please unbind the current one before pairing.)

Troubleshooting

Heart-rate signal missing

The S2 Kid **sport** watch keeps paying attention to your heart rate data during your exercise and your daily life. Sometime the watch may not get a suitable heart rate signal. At this time, the missing heart rate data will appear at the dotted line.

If you can't get the heart rate signal, first you should confirm that you wear the watch correctly, adjust it to avoid being too high or too low, neither too tight or too loose on your wrist. After adjustment, turn on real-time heart rate monitoring to get the data.

If there is still no heart rate data, check if the heart rate monitoring function is turned on at CO-FIT App.

Other problems.

If your mobile cannot pair the watch, click Settings-Bluetooth in your mobile and check if there is signal of S2. If yes, it means there is no problem with the Bluetooth signal. Please check if the watch is paired with other phones, please unbind it. IOS device users should click Setting -Bluetooth - ignore this device and then pair it.

Exemption Clause

1. The Heart Rate and Blood Pressure data output by S2 are not intended to be a medical or diagnostic basis.
2. Self-diagnosis and self-treatment are dangerous. Only qualified physicians are allowed to diagnose and treat high blood pressure or any other heart diseases. Please contact your physician for more professional diagnostic opinions.

3. The data and information of heart rate and blood pressure provided by S2 may not be completely accurate and may exceed the tolerance as per the specification stated in the document due to different factors, such as interference with signal from external sources, incorrect wearing position and changes in weather conditions or user's body condition.

4. DO NOT adjust any of your medication or therapeutic schedule based on the results output by S2. Please follow the doctor's instructions before taking any treatment or medication.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
