

TWEEZE-IT OPERATING INSTRUCTIONS

Thank You for the purchase of “Tweeze-it”

“Tweeze-It” has 2 parts. The tweezers part and the power bank part that is connected to become "Tweeze-it".

1. Use the provided USB cable and connect “Tweeze-it” to a USB source.
2. As soon as the 2 LEDs turn green the unit is ready to use. (The first charge will take some time) We suggest repeating step 1 and 2 every week.
3. From your App store download “Tweeze-it” App.
4. Pull the Tweezers section from the power bank section and open the Wifi communication on your phone.
5. Choose the FPV.... Address or to Tweeze-it address.
6. Go back to the “Tweeze-it” App and open the App.
7. Press the arrow on the screen and your Tweeze-it will show the image of the tip of the tweezers on your phone screen.

Enjoy!!!

The picture transmission is in the range of 5-6 feet.

Move the tweezers in a smooth move for a great picture.

You can Video the picture via the application screen as well as take a single picture. Both options are on the App screen and they are private only to be saved on your phone.

Caution: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

End user must follow the specific operating instructions for satisfying RF exposure compliance. The portable device is designed to meet the requirements for exposure to radio waves established by the Federal Communications Commission (USA). These requirements set a SAR limit of 1.6 W/kg (head)/ 4.0 W/kg(extremity) averaged over one gram of tissue. The highest SAR value reported under this standard during product certification for use when properly worn on the body
